Timeline Spanish Rubric:

Timelines of American Literature Cody Marrs, Christopher Hager, 2019-01-29 A collection of engaging essays that seeks to uniquely reperiodize American literature. It is all but inevitable for literary history to be divided into periods: Early American, antebellum, modern, post 1945. Such designations organize our knowledge of the past and shape the ways we discuss that past today. These periods tend to align with the watershed moments in American history, even as the field has shifted its perspective away from the nation state. It is high time we rethink these defining periods of American literary history, as the drawing of literary timelines is a necessary even illuminating practice. In these short, spirited and imaginative essays, 23 leading Americanists gamely fashion new, unorthodox literary periods from 600 B.C.E. to the present, from the Age of Van Buren to the Age of Microeconomics. They bring to light literary and cultural histories that have been obscured by traditional timelines and raise provocative questions: What is our definition of modernism if we imagine it stretching from 1865 to 1965 instead of 1890 to 1945? How does the captivity narrative change when we consider it as a contemporary, not just a colonial genre? What does the course of American literature look like set against the backdrop of federal denials of Native sovereignty or housing policies that exacerbated segregation? Filled with challenges to scholars, inspirations for teachers anchored by an appendix of syllabi and entry points for students, *Timelines of American Literature* gathers some of the most exciting new work in the field to showcase the revelatory potential of fresh thinking about how we organize the literary past.

Interdisciplinary Teaching About Earth and the Environment for a Sustainable Future David C. Gosselin, Anne E. Egger, J. John Taber, 2018-12-13 Interdisciplinary Teaching about the Earth and Environment for a Sustainable Future presents the outcomes of the InTeGrate project, a community effort funded by the National Science Foundation to improve Earth literacy and build a workforce prepared to tackle environmental and resource issues. The InTeGrate community is built around the shared goal of supporting interdisciplinary learning about Earth across the undergraduate curriculum, focusing on the grand challenges facing society and the important role that the geosciences play in addressing these grand challenges. The chapters in this book explicitly illustrate the intimate relationship between geoscience and sustainability that is often opaque to students. The authors of these chapters are faculty members, administrators, program directors, and researchers from institutions across the country who have collectively envisioned, implemented, and evaluated effective change in their classrooms, programs, institutions, and beyond. This book provides guidance to anyone interested in implementing change on scales ranging from a single course to an entire program by infusing sustainability across the curriculum, broadening access to Earth and environmental sciences, and assessing the
