The Evolution of Rhythm Cognition: Timing in Music and Speech Andrea Ravignani, Henkjan Honing, Sonja A. Kotz, 2018-07-24 Human speech and music share a number of similarities and differences One of the closest similarities is their temporal nature as both i develop over time ii form sequences of temporal intervals possibly differing in duration and acoustical marking by different spectral properties which are perceived as a rhythm and iii generate metrical expectations Human brains are particularly efficient in perceiving producing and processing fine rhythmic information in music and speech However a number of critical questions remain to be answered Where does this human sensitivity for rhythm arise How did rhythm cognition develop in human evolution How did environmental rhythms affect the evolution of brain rhythms Which rhythm specific neural circuits are shared between speech and music or even with other domains Evolutionary processes long time scales often prevent direct observation understanding the psychology of rhythm and its evolution requires a close fitting integration of different perspectives First empirical observations of music and speech in the field are contrasted and generate testable hypotheses Experiments exploring linguistic and musical rhythm are performed across sensory modalities ages and animal species to address questions about domain specificity development and an evolutionary path of rhythm Finally experimental insights are integrated via synthetic modeling generating testable predictions about brain oscillations underlying rhythm cognition and its evolution Our understanding of the cognitive neurobiological and evolutionary bases of rhythm is rapidly increasing However researchers in different fields often work on parallel potentially converging strands with little mutual awareness This research topic builds a bridge across several disciplines focusing on the cognitive neuroscience of rhythm as an evolutionary process It includes contributions encompassing although not limited to 1 developmental and comparative studies of rhythm e g critical acquisition periods innateness 2 evidence of rhythmic behavior in other species both spontaneous and in controlled experiments 3 comparisons of rhythm processing in music and speech e g behavioral experiments systems neuroscience perspectives on music speech networks 4 evidence on rhythm processing across modalities and domains 5 studies on rhythm in interaction and context social affective etc 6 mathematical and computational e g connectionist symbolic models of rhythmicity as an evolved behavior

Data-Driven Ocean Environmental Perception with its Applications Jianchuan Yin,Yu Jiang,Phoebe Koundouri,Hongde Qin,2025-05-27 Data driven ocean environmental perception refers to the various data driven methodologies used by researchers to study understand and explore the ocean for sustainable marine ecosystem the blue ocean economy and other ocean related activities Ocean environment perception techniques also pave the way for deep insight and full exploration of ocean resources such as coastal and marine ecosystem protection ocean vehicle operation and management and ocean energy utilization However it is hard for traditional data processing techniques to get comprehensive understanding of the ocean environmental information attributed to the complex characteristics of environmental information The traditional data processing techniques are facing challenges such as Unable

to fully capture the non linearity and intrinsic uncertain of complex ocean systems Isolated systems are involved and make it difficult to integrate data from various sources Overwhelming for handling enormous amounts of data leading to performance issues and long processing times Costly in scalability both in terms of hardware and operational expenses Advances in data driven methodologies Highly dynamic nonlinearity and uncertainty mapping capability in complex system evolution Leveraging vast amounts of data collected from various sources effectively Flexibility in handling various types of data including structured semi structured and unstructured data Handling big data efficiently by making use of distributed computing and storage Data driven technologies are a set of techniques dealing with complex systems which can mine valuable potential relationships from measurement data through intelligent computational approaches such as machine learning data mining data fusion reinforcement learning etc Data driven applications on the aspect of Remote Sensing Autonomous Underwater Vehicles AUVs Remotely Operated Vehicles ROVs Acoustic Sensing Buoy Networks Internet of Things IoT for the oceans and Ocean Digital Twin are becoming increasingly crucial for ocean environmental perception leveraging vast amounts of data collected from various sources to monitor analyze and predict oceanic atmospheric and marine ecological conditions This helps us to identify and monitor environmental changes and better understand the complex relationships between different components of the ocean ecosystem It also provides essential ways to explore how people understand value or engage with marine environment and the Blue Economy such as renewable wind wave energy marine ranching industry for sustainable food energy etc The focus of this research topic is dedicated to recent advances in data driven technologies implemented for the field of ocean environment perception and their applications for the blue ocean economy sustainable marine ecosystem and other ocean related activities This topic also aims to extend the future implications of data driven techniques in the field of ocean research It calls for original and novel research related to ocean environmental perception based on data driven techniques Potential topics of interest include but are not limited to the following Monitor Analysis and Prediction of Oceanic Conditions ML and AI algorithms Ocean Monitoring system Buoy Networks Satellite Remote Sensing and Acoustic Sensing Applications Big Data Internet of Things IoT Digital Twins for ocean and Smart Ocean Ocean Environmental Data Processing and Information Fusion Methods Data Driven Control Operation and Management of Ocean Vehicles AUV ROV USV et al for Ocean Environment perception and marine ecosystem monitoring Coastal and Marine Ecosystem Evaluation Protection and Management Based on Data Driven Techniques Data Driven Assessment and Effect Analysis of Climate Change and Human Activities on Oceans Global Marine Governance and Ocean Management in the Principle of Blue Economy Sustainable Development Goals SDGs and UN Ocean Decade Utilization Management and Governance of Renewable Ocean Energies Tidal Currents Waves Wind Thermal and Salinity Gradients etc based on Data Driven Ocean Environment Perception Management of Marine Infrastructure and Maritime Shipping Based on Ocean Environment Perception A Smarter Toronto Bob Hanke,2024-02-19 This book bridges media technocultural urban

and journalism studies to examine the role of journalism in relation to a smart city project on Toronto's waterfront. From the announcement of the public-private partnership called Sidewalk Toronto to the project's termination, a mediatized controversy unfolded. Through an assemblage approach to this project and a case study of *The Globe and Mail* and the *Toronto Star*, it follows the actors and chronicles the Quayside project story as a conversation about the promise and perils of a future smart neighbourhood. In the news of Waterfront Toronto, Sidewalk Labs, other actors, events, and developments, there were multiple voices and views, interpretations and arguments that manifested conflicting interests and values. As a locally situated actor, journalism produced a porous discourse that expressed a propose and public pushback movement. This work of articulating mediation conditioned the project's alteration and dissolution within asymmetrical relations of power. In addition to a wave of opposition that inflected the project's enactment, a time lag between project time and governmental policymaking made the controversy over this future urban space intractable. With their residual symbolic power, quality journalism contributed to dialogical urban learning.
