Experimental Conversations Timothy N. Ogden, 2024-03-19 Discussions of the use and limits of randomized control trials considering the power of theory external validity gaps in knowledge and what issues matter. The practice of development economics has undergone something of a revolution as many economists have adopted new methods to answer perennial questions about the effectiveness of anti-poverty programs. In this book prominent development economists discuss the use and impact of one of the most significant of these new methods: randomized control trials (RCTs) and field experiments. In extended interviews conducted over a period of several years, they explain their work and their thinking and consider the broader issues of how we learn about the world and how we can change it for the better. These conversations offer specialists and nonspecialists alike a unique opportunity to hear economists speak in their own words, free of the confines of a particular study or econometric esoterica. The economists describe how they apply research findings in the way they think about the world, revealing their ideas about the power of theory, external validity gaps in knowledge, and what issues matter. Also included are interviews with RCT observers, critics, sponsors, consumers, and others. Each interview provides a brief biography of the interviewee. Thorough annotations offer background and explanations for key ideas and studies referred to in the conversations. Contributors: Abhijit Banerjee, Nancy Birdsall, Chris Blattman, Alex Counts, Tyler Cowen, Angus Deaton, Frank DeGiovanni, Esther Duflo, Pascaline Dupas, Xavi Gine, Rachel Glennerster, Judy Gueron, Elie Hassenfeld, Dean Karlan, Michael Kremer, David McKenzie, Jonathan Morduch, Lant Pritchett, Jonathan Robinson, Antoinette Schoar, Dean Yang **Economics** Anthony J. Evans, 2021-03-18 First published as *Markets for Managers*, this book has proved to be a popular way for non-economists to understand and apply the key tools of economics. Professor Anthony J. Evans, one of Europe's leading Managerial Economics instructors, brings the content that works in his classrooms to an even wider audience. Written in an engaging and informal way, whether you are a busy executive or simply an interested amateur, this is your go-to guide. In this revised and updated edition, you will be led through the building blocks of economic theory and how they relate to the real world. You will see how thinking like an economist can improve your decision making and how markets can be used to generate value within organizations and in society at large. The book incorporates the main principles of both micro and macroeconomics and takes a broad and diverse approach. In it, you will encounter the most interesting economists and understand their contributions in a historical context. The practical format is perfect for professionals and students who want to gain an applied perspective on today's most pressing economic issues **Refugees, Refuge, and Human Displacement** Ignacio López-Calvo, Marjorie Agosin, 2022-11-01 Every American is a descendant of either a Native American and enslaved person, an immigrant, or a refugee. This book is devoted to the fourth category. The essays in this volume will

study the concept of refuge as well as historical forced displacement and statelessness trying to provide potential lasting solutions to the many problems associated with this situation This volume is not only timely but expansive as it moves from the pressing crisis of refugees to the crisis of humanity that seeks to find refuge From refugees to asylum seekers from climate change to war from historical uprootedness and displacement to today s crisis of refugeeism these topics are mobilizing humanities scholars to think about refugees with a new sense of urgency This book demonstrates how interdisciplinary cultural approaches grounded in the humanities can transform refugee conversations so often dominated by political science economics and other disciplines In doing so the collection sets up far more inclusive refugee discussions and urges humanities thinkers to respond by taking the lead in the face of environmental and sociopolitical uncertainties
