Conserving Canvas Cynthia Schwarz, Ian McClure, Jim Coddington, 2023-10-24 The most authoritative publication in nearly fifty years on the subject of conserving paintings on canvas In 2019 Yale University with the support of the Getty Foundation held an international conference where nearly four hundred attendees from more than twenty countries gathered to discuss a vital topic how best to conserve paintings on canvas It was the first major symposium on the subject since 1974 when wax resin and glue paste lining reigned as the predominant conservation techniques Over the past fifty years such methods which were often destructive to artworks have become less widely used in favor of more minimalist approaches to intervention More recent decades have witnessed the reevaluation of traditional practices as well as focused research supporting significant new methodologies procedures and synthetic materials for the care and conservation of paintings on fabric supports *Conserving Canvas* compiles the proceedings of the conference presenting a wide array of papers and posters that provide important global perspectives on the history current state and future needs of the field Featuring an expansive glossary of terms that will be an invaluable resource for conservators this publication promises to become a standard reference for the international conservation community The free online edition of this open access publication is available at getty.edu/publications/conserving_canvas Also available are free PDF and EPUB downloads of the book

Current Literature

Edward Jewitt Wheeler, Frank Crane, 1913 [Conservation of Marine Archaeological Objects](#) Colin Pearson, 2014-05-20 Over the past twenty years there has been a significant increase in underwater activities such as scuba diving which coupled with the adventure and romance always associated with shipwrecks has led to rapid developments in the discovery and excavation of shipwrecked material These shipwrecks are invaluable archaeological time capsules which in the majority of cases have come to an equilibrium with their environment As soon as artefacts on the wreck site are moved this equilibrium is disturbed

and the artefacts may commence to deteriorate sometimes in a rapid and devastating fashion In fact excavation without having conservation facilities available is vandalism the artefacts are much safer being left on the sea bed Such famous shipwrecks as the Mary Rose 1545 the Wasa 1628 and the Batabia 1629 have not only brought the world s attention to these unique finds but have also produced tremendous conservation problems The treatment of a 30 metre waterlogged wooden hull or large cast iron cannon is still causing headaches to conservators
