Turner, 2018-11-08 Of the few historical shortlists women make as influencers in the arts the same few names are recognized making the catalogue of powerful and gifted females feel like a small and exclusive club The truth is however that far more women than we know can be credited with contributions to the industries in which they honed their crafts In 1940 when the world was at war and the Civil Rights Movement had yet to turn the page of history Hattie McDaniel became the first black woman to win an Academy Award She and Anna May Wong fought hard to pave the way for actresses of color and fight against racial stereotypes Maria Tallchief was the first and one of the only Native American prima ballerinas to push past the stage wings toward the limelight More than just performers these women were people as well In Hidden in History The Untold Stories of Female Artists Musicians and Writers the lives of many of these artists are explored from Edmonia Lewis wrongful expulsion from higher learning to the boundary breaking talents of the International Sweethearts of Rhythm and their untraditional start as a school band This book is an open door to the lives of 10 female artists wordsmiths and performers whose work has often been overlooked in the dusty pages of an often male dictated narration **Artists Compared by Age, Sex, and Earning in 1970 and 1976** National Endowment for the Arts. Research Division, 1980 The

purpose of this report is to examine the population of artists in terms of age sex and earnings and to compare the results from 1970 and 1976 An artist in this report includes people in the following categories actors architects dancers designers musicians and composers painters and sculptors photographers and radio and television announcers Highlights of the analysis report that the number of artists increased 50% from 1970 to 1976 from 600 000 to 900 000 but that median earnings remained the same at 7 900 The lack of increase in earnings is explained by the 50% increase in artists while positions for artists increased by only 23% The number of women in artistic occupations increased by 80% while males in artistic occupations increased by half that amount In 1970 artists personal earnings contributed 62% of their household earnings by 1976 the contribution had fallen to 44% Women were more dependent on other household members than men were and accounted for only a quarter of the total household income in 1970 and 1976 These data suggest that while artists personal earnings are relatively low artists tend to be members of households which compare closely with total household earnings of all professionals Although artists median personal earnings did not increase between 1970 and 1976 the total household earnings rose by 40% during this period The artists population is composed of relatively young people and is predominantly male From 1970 to 1976 the population became younger and the proportion of women artists increased The mid decade observation period was marked by a recession in which the rate of artistic unemployment increased more than all professional workers The difference reflects the increased proportion of young people women and blacks in artistic occupations because unemployment rates are generally higher for these groups Over 40 tables and figures display and support the findings APG
