SII Lighting Guide 1:

Human Factors in Lighting, Third Edition Peter Robert Boyce, 2014-04-07 The availability of electric lighting has changed the lives of people the world over yet as a major user of electricity it has come under increasing scrutiny in recent years This scrutiny has focused largely on the environmental consequences with little consideration of the benefits of lighting Human Factors in Lighting Third Edition restores some balance to the discussion by examining the ways in which people interact with lighting These interactions influence the ability to perform visual tasks the perception of people objects and spaces human comfort and behavior as well as human health and safety It is only by understanding how to use light to achieve these ends that lighting can be provided effectively and efficiently to the benefit of all See What's New in the Third Edition New chapters on the non image forming system lighting for pedestrians light pollution and lighting and electricity use Revision of all other chapters to update them to take into account the advances that have been made in our understanding of the effects of light on people over the last decade Integration of the combined effects of light via the visual and non image forming systems on performance and perception The book covers both the visual and the non visual effects of light on people as well as the benefits of lighting and the costs it imposes on the environment It details the consequences of exposure to lighting or lighting technology and the role of exposure to light on such basic functions of the body as circadian rhythms The author combines information from many different sources and integrates them into a coherent overview of lighting practice that can be used to develop better lighting solutions at a lower environmental cost

Metric Handbook David Littlefield, 2012-09-10 Fully updated in reference to the latest construction standards and new building types Sustainable design fully integrated into each chapter Over 100 000 copies sold to successive generations of architects and designers this book truly belongs on every design office desk and drawing board The Metric Handbook is the major handbook of planning and design data for architects and architecture students Covering basic design data for all the major building types it is the ideal starting point for any project For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of As well as buildings the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook really is the unique reference for solving everyday planning problems About the Author David Littlefield is a senior lecturer at the University of the West of England where he teaches in the department of planning and architecture For many years he worked as a writer and journalist David has written co written or edited over ten books on architecture

Customer reviews This book is a great investment as you will use it throughout your career as an architect I have found that this book is the Bible for all planners contains so much information that no designer or planner should be without a copy An essential reference book that should be on the shelf in any design studio

The Colour, Light and Contrast Manual Keith Bright, Geoffrey Cook, 2010-01-06 Endorsed by the Society of Light and Lighting this practical book offers comprehensive guidance on how colour light and contrast can be incorporated within buildings to enhance their usability The book provides state of the art clear guidance as well as a valuable information source for busy professionals involved in the design or management of new and existing environments The ways colour light and contrast are used within built environments are critical in determining how people interact with the space and how confident safe and secure they will feel when doing so They also have a major influence on a person s sense of well being and their ability to use the environment independently and

without undue effort Understanding how to use colour and contrast and how they are influenced by both natural and artificial lighting is vital for all those involved in the design and management of the environments and spaces we all use In recent years there has been a considerable amount of work undertaken to further our understanding of how colour light and contrast affect emotion and sensory abilities and how they can assist or hinder people in their everyday lives Other publications consider these issues individually but *The Colour Light and Contrast Manual* designing and managing inclusive built environments draws knowledge and information together to produce a unique comprehensive and informative guide to how the three elements can work together to improve the design and management of environments for us all Supporting website at www.wiley.com/go/brightandcook

The Design of Lighting Peter Tregenza, 2013-10-30 This fully updated edition of the successful book *The Design of Lighting* provides the lighting knowledge needed by the architect in practice the interior designer and students of both disciplines The new edition offers a clear structure carefully selected material and linking of lighting with other subjects in order to provide the reader with a comprehensive and specifically architectural approach to lighting Features of this new edition include technical knowledge of lighting in the context of architectural design an emphasis on imagination in architectural light and presentation of the tools necessary in practice for creative design additional chapters on the behaviour of light and on the context of design a strong emphasis on sustainable design and energy saving with data and examples analyses of actual lighting schemes and references to current standards and design guides an up to date review of lamp and lighting technology with recommendations on the choice of equipment a revision of the calculation section with examples and step by step instructions based on recent student feedback about the book

Making Buildings Inclusive and Accessible 2009: Special Report, *ERDA Energy Research Abstracts* United States. Energy Research and Development Administration, 1976-05

The Inclusive Housing Design Guide Habinteg Housing Association, 2024-10-01 The Inclusive Housing Design Guide is a revised and updated edition of the seminal Habinteg Housing Design Guide first published in 2002 The guide provides a brief and advice for all those involved in the design and delivery of Habinteg developments informing new build technical standards and employers requirements for accessible homes This new guide takes into account updated reference standards specifically addressing M4 2 and M4 3 of UK building regulations The proposed guide will provide the rationale for specifications and technical guidance on how to deliver accessible and inclusive housing that is flexible and adaptable to changing needs With invaluable advice insights explanations and illustrations it is an essential guide on how to deliver housing that is functional inclusive and meets the changing needs of people of all ages
