Quality Assurance of Aquatic Foods G. Jeyasekaran, R. Jeya Shakila, 2020-11-11 This book deals with the quality and safety of aquatic food. It focuses clearly on biological and chemical hazards, antibiotic and pesticide residues, and heavy metal contaminants associated with aquatic food. The quality problems in various aquatic food products and their methods of assessment are exhaustively dealt in this book. Besides food quality management systems like HACCP, SSOP, SCP, GHP, GMP, have also been explained for easy adoption. The International and National Standards prescribed by FSSAI, EIC, BIS, Codex, USFDA, ISO, and EU for aquatic food products are explicitly given. It is also useful to the personnel of aquatic food industries to improve their working knowledge on maintaining the quality and safety of aquatic foods. Note: T F does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh, and Sri Lanka.

Statistical Quality Control for the Food Industry Merton Hubbard, 2013-11-11 Considering the ability of food processing companies to consistently manufacture safe foods with uniform quality over the past 20 or 30 years without these new tools and new systems, one might expect that quality control improvements would be marginal. On the other hand, these changes have already provided substantial opportunities for process and product improvement. This second edition is intended to update the basic concepts and discuss some of the new ones. Preface to the First Edition: If an automobile tire leaks or an electric light switch fails, if we are short-changed at a department store or erroneously billed for phone calls not made, if a plane departure is delayed due to a mechanical failure, these are rather ordinary annoyances which we have come to accept as normal occurrences. Contrast this with failure of a food product. If foreign matter is found in a food, if a product is discolored or crushed, if illness or discomfort occurs when a food product is eaten, the consumer reacts with anger, fear, and sometimes mass hysteria. The offending product is often returned to the seller or a disgruntled letter is written to the manufacturer. In an extreme case, an expensive law suit may be filed against the company. The reaction is almost as severe if the failure is a difficult-to-open package or a leaking container. There is no tolerance for failure of food products.
