uneven quality and even on occasion idiosyncratic rather than drawing upon a close familiarity with state of the art ethical theory One of the volume s aims is to promote a more robust and theoretically informed approach to the ethical dimension of discussions on space and society While the contributions are written in a manner which is accessible across disciplines the book still withstands scrutiny by those whose work is primarily on ethics At the same time it allows academics across a range of disciplines an insight into current approaches toward how the work of ethics gets done The issues of value raised could be used to inform debates about regulation space law and protocols for microbial discovery as well as longer range policy debates about funding

Human Rights and Personal Self-defense in International Law Jan Arno Hessbruegge,2017 While an abundance of literature covers the right of states to defend themselves against external aggression this is the first book dedicated to the right to personal self defense in international law Dr Hessbruegge sets out in careful detail the strict requirements that human rights impose on defensive force by law enforcement authorities especially police killings in self defense The book also discusses the exceptional application of the right to personal self defense in military led operations notably to contain violent civilians who do not directly participate in hostilities The author establishes that international law gives individuals the right to forcibly resist human rights violations that pose a serious risk of significant and irreparable harm At the same time he calls into question prevailing state practice which fails to recognize any collective right to organized armed resistance even when it constitutes the last resort to defend against genocide or other mass atrocities

Corporate Criminality and Liability for Fraud Alison Cronin,2018-03-14 Through a rational reconstruction of orthodox legal principles and reference to cutting edge neuro science this book reveals some startling truths about the criminal law its history and the fundamental doctrines that underpin the attribution of criminal fault While this has important implications for the criminal law generally the focus of this work is the development of a theory of corporate criminality that accords with modern theory of group agency itself informed by advancements in contemporary philosophy and social science The innovation it proposes is the theoretical and practical means by which criminal fault can be attributed directly to the corporate actor where liability cannot or should not be reduced to its individual members

Consent Alan Reed,Michael Bohlander,Nicola Wake,Emma Smith,2016-10-14 This volume presents a leading contribution to the substantive arena relating to consent in the criminal law In broad terms the ambit of legally valid consent in extant law is contestable and opaque and reveals significant problems in adoption of consistent approaches to doctrinal and theoretical underpinnings of consent This book seeks to provide a logical template to focus the debate The overall concept addresses three specific elements within this arena embracing an overarching synergy between them This edifice engages in an examination of UK provisions with specialist contributions on Irish and Scottish law and in contrasting these provisions against alternative domestic jurisdictions as well as comparative contributions addressing a particularised research grid for consent The comparative chapters provide a wider background of how other legal systems treat a variety of specialised issues relating to

consent in the context of the criminal law The debate in relation to consent principles continues for academics practitioners and within the criminal justice system Having expert descriptions of the wider issues surrounding the particular discussion and of other legal systems approaches serves to stimulate and inform that debate This collection will be a major source of reference for future discussion

In Search of Criminal Responsibility Nicola Lacey, 2016-04-26 What makes someone responsible for a crime and therefore liable to punishment under the criminal law Modern lawyers will quickly and easily point to the criminal law's requirement of concurrent actus reus and mens rea doctrines of the criminal law which ensure that someone will only be found criminally responsible if they have committed criminal conduct while possessing capacities of understanding awareness and self control at the time of offense Any notion of criminal responsibility based on the character of the offender meaning an implication of criminality based on reputation or the assumed disposition of the person would seem to today's criminal lawyer a relic of the 18th Century In this volume Nicola Lacey demonstrates that the practice of character based patterns of attribution was not laid to rest in 18th Century criminal law but is alive and well in contemporary English criminal responsibility attribution Building upon the analysis of criminal responsibility in her previous book *Women Crime and Character* Lacey investigates the

changing nature of criminal responsibility in English law from the mid 18th Century to the early 21st Century Through a combined philosophical historical and socio legal approach this volume evidences how the theory behind criminal responsibility has shifted over time The character and outcome responsibility which dominated criminal law in the 18th Century diminished in ideological importance in the following two centuries when the idea of responsibility as founded in capacity was gradually established as the core of criminal law Lacey traces the historical trajectory of responsibility into the 21st Century arguing that ideas of character responsibility and the discourse of responsibility as founded in risk are enjoying a renaissance in the modern criminal law These ideas of criminal responsibility are explored through an examination of the institutions through which they are produced interpreted and executed the interests which have shaped both doctrines and institutions and the substantive social functions which criminal law and punishment have been expected to perform at different points in history
