1.0 BUSINESS AND MANAGEMENT

Describes the skills used to translate an organizations business goals into appropriate maintenance and reliability goals that support and contribute to the organization's business results.

1.1 Create strategic direction and plan for Maintenance and Reliability operations (provide, vision, provide clear and measureable goals, develop business case, etc.)

Create a vision, mission and strategic plan to guide implementation of appropriate maintenance and reliability processes.

- Identify sponsors for change
- Identify long term business goals and what key results must be achieved
- Identify today's performance and key results areas
 - Vision: what would we be if we were good enough to achieve our goals?
- Goals should be clear, measureable and established in a top down (cascading) manner
- List and group actions to close gap of vision with current status
 - Utilize knowledge of industry benchmarks to establish goals

1.2 Administer strategic plan (develop support, prepare budgets, obtain approval and resources, implement plan, etc.)

A solid business case should be developed that specifies the benefits in financial terms.

The business case should include:

- An understanding of the changes that will be required to the organization structure, personnel, roles and responsibilities, tools and training and priorities

Key components of a business case:

- Justification
- Current state
- Future state
- Gaps
- Action plan to close gaps
