Princeton Tec cares about the environment and recommends recycling batteries. For more information about battery recycling, please go to www.batterycycling.com.

To install batteries, first remove the light body from the mounting bracket. Slide the battery door latch toward front of light and rotate the door open. Install three AAA batteries oriented so each negative terminal contacts a corresponding spring. Observe proper battery polarity when installing the batteries. Improper installation of the batteries will damage the light and void the warranty. Rotate the door toward the closed position, and then squeeze the door and body to latch the door.

- Never mix different battery brands or chemistry types.
- Always remove drained batteries immediately.
- Remove batteries during long periods of storage.

Troubleshooting

If the Snap fails to light:

- Check the batteries for proper installation.
- Replace batteries if proper installation is confirmed.
- Check circuit board for water. The light will resume normal operation once the water is shaken or blown out and the light is left open until completely dry. If the light has been contaminated with salt water, flush the unit with fresh water and dry as described above.
