Interpersonal Communication in the Diverse Workplace Geraldine Hynes, 2023-02-10 Foregrounding the vital importance of interpersonal communication and cultural competence in the workplace, this book offers concise practical strategies for daily communication in a global business environment. The workplace is steadily becoming more diverse, and cultural competence is widely recognized as a key to success in terms of revenue, profit, market share, and workforce productivity. This and diversity appreciation are the two cornerstones for effective interpersonal communication, facilitating relationship development, improving job satisfaction, commitment, loyalty, and trust, and leading to performance and organizational success. The effectiveness of diversity training sessions and cultural guidebooks can vary. Business professionals need a book that presents more than descriptions of culture-bound business practices or prescriptions for valuing diversity. This book is that practical solution, presenting a conceptual model along with tools to put it to work from day one, including cases and examples. With its strategies for reducing diversity misuses, techniques for responding in uncomfortable conversations, and innovative ways to bridge cultural gaps, this book will help current and aspiring leaders across industries build rapport and promote constructive behaviors in a diverse work environment, resulting in organizational success.

The Consuming Instinct Gad Saad, 2011-06-21 In this highly informative and entertaining book, the founder of the vibrant new field of evolutionary consumption illuminates the relevance of our biological heritage to our daily lives as consumers. While culture is important, the author shows that innate evolutionary forces deeply influence the foods we eat, the gifts we offer, the cosmetics and clothing styles we choose to make ourselves more attractive to potential mates, and even the cultural products that stimulate our imaginations, such as art, music, and religion. The book demonstrates that most acts of consumption can be mapped onto four key Darwinian drives: namely, survival (we prefer foods high in calories), reproduction (we use products as sexual signals), kin selection (we naturally exchange gifts with family members), and reciprocal altruism (we enjoy offering gifts to close friends). The author further highlights the analogous behaviors that exist between human consumers and a wide range of animals. For anyone interested in the biological basis of human behavior or simply in what makes consumers tick, marketing professionals, advertisers, psychology
