Morromatto Comics, 2023-01-12 Time Enough at Last is known as the eighth episode of the American television anthology series The Twilight Zone. The episode was adapted from a short story written by Lynn Venable. The short story appeared in the January 1953 edition of the science fiction magazine If Worlds of Science Fiction about seven years before the television episode first aired. Time Enough at Last became one of the most famous episodes of the original Twilight Zone. It is the story of a man who seeks salvation in the rubble of a ruined world and tells of Henry Bemis, played by Burgess Meredith, who loves books yet is surrounded by those who would prevent him from reading them. The episode follows Bemis through the post-apocalyptic world, touching on such social issues as anti-intellectualism, the dangers of reliance upon technology, and the difference between solitude and loneliness. This comic book version is a work of art, an experiment using rotoscoping, coloring, and hand painting techniques to add value and recognition to a classic of international cinema, thus collaborating to preserve and popularize 20th-century human culture for generations to come. **Dr. Strangelove's**

America Margot A. Henriksen, 2023-04-28 Did America really learn to stop worrying and love the bomb as the title of Stanley Kubrick's 1964 film Dr. Strangelove would have us believe? Does that darkly satirical comedy have anything in common with Martin Luther King Jr.'s impassioned I Have a Dream speech or with Elvis Presley's throbbing I'm All Shook Up? In Margot Henriksen's vivid depiction of the decades after World War II, all three are expressions of a cultural revolution directly related to the atomic bomb. Although many scientists and other Americans protested the pursuit of nuclear superiority after World War II ended, they were drowned out by Cold War rhetoric that encouraged a culture of consensus. Nonetheless, Henriksen says, a culture of dissent arose, and she traces this rebellion through all forms of popular culture. At first, artists

expressed their anger anxiety and despair in familiar terms that addressed nuclear reality only indirectly But Henriksen focuses primarily on new modes of expression that emerged discussing the disturbing themes of film noir with extended attention to Alfred Hitchcock and science fiction films Beat poetry rock n roll and Pop Art Black humor became a primary weapon in the cultural revolution while literature movies and music gave free rein to every possible expression of the generation gap Cultural upheavals from flower power to the civil rights movement accentuated the failure of old values Filled with fascinating examples of cultural responses to the Atomic Age Henriksen s book is a must read for anyone interested in the United States at mid twentieth century Did America really learn to stop worrying and love the bomb as the title of Stanley Kubrick s 1964 film Dr Strangelove would have us believe Does that darkly satirical comedy have anything in common with Martin Luther King Jr s impassioned **An Exploration of Space 1999 Through the Lens of Video Games: Payne 1999**

The Dance of Person and Place Thomas M. Norton-Smith, 2010-04-01 Uses the concept of world making to provide an introduction to American Indian philosophy Ever since first contact with Europeans American Indian stories about how the world is have been regarded as interesting objects of study but also as childish and savage philosophically curious and ethically monstrous Using the writings of early ethnographers and cultural anthropologists early narratives told or written by Indians and scholarly work by contemporary Native writers and philosophers Shawnee philosopher Thomas M Norton Smith develops a rational reconstruction of American Indian philosophy as a dance of person and place He views Native philosophy through the lens of a culturally sophisticated constructivism grounded in the work of contemporary American analytic philosopher Nelson Goodman in which descriptions of the world or world versions satisfying certain criteria construct actual worlds words make worlds Ultimately Norton Smith argues that the Native ways of organizing experiences with spoken words and other performances construct real worlds as robustly as their Western

counterparts and in so doing he helps to bridge the chasm between Western and American Indian philosophical traditions a deft and self aware exemplification of the task of cross cultural comparison The writing is accessible and shows a deft and helpful interplay between abstract language and concrete illustrative material The Pluralist Norton Smith does a good job illustrating how worlds are created through language and how language itself contains philosophy H Net Reviews H Environment Norton Smith offers an insightful discussion of Native American epistemological concepts This book is an excellent exercise for all philosophy students as an expansion of worldviews and an examination of Western epistemological foundations and biases It also offers an insightful discussion of indigenous philosophy for both philosophy and indigenous scholars Highly recommended CHOICE The author opens a unique and exciting avenue for philosophical discourse by demonstrating a method of inquiry that provides a new way of interpreting Native thinking a method that not only promotes Native philosophical systems but allows for greater communication between Western and Native philosophers Lorraine Mayer author of Cries from a M tis Heart Challenging and provocative this book is a great step forward in the conversation of academic Indigenous philosophy Brian Yazzie Burkhart Pitzer College
