A Magna Carta for all Humanity Francesca Klug, 2015-05-08 The Magna Carta sealed in 1215 has come to stand for the rule of law curbs on executive power and the freedom to enjoy basic liberties When the Universal Declaration of Human Rights was adopted by the United Nations in 1948 it was heralded as a Magna Carta for all human kind Yet in the year in which this medieval Charter's 800th anniversary is widely celebrated the future of the UK's commitment to international human rights standards is in doubt Are universal values commendable as a benchmark by which to judge the rest of the world but unacceptable when applied at home Francesca Klug takes us on a journey through time exploring such topics as British values natural rights enlightenment values and legal rights to convey what is both distinctive and challenging about the ethic and practice of universal human rights It is only through this prism she argues that the current debate on human rights protection in the UK can be understood This book will be of interest to students of British Politics Law Human Rights and International Relations

erase the threats of pollution water shortages and floods Such concerns offer two prompts for public engagement and participation First on a purely instrumental level public engagement can complement or offer an obvious alternative to technical fixes Second public engagement may provide a route to find new ways of addressing water and related challenges The author offers a unique social science perspective on many of the socio technical issues facing the management of water in urban settings in developed countries where urban is interpreted broadly to include all areas served by piped water Drawing on historical context and an extensive review of the published literature as well as the author s own empirical studies the work prompts broader discussions about how we manage water in contemporary society It is invaluable for students and professionals in water resource management and planning
