2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

China's Policy towards the South China Sea Lingqun Li,2018-02-19 This book provides an explanation of Chinese policy towards the South China Sea and argues that this has been sculpted by the changing dynamics of the law of the sea in conjunction with regional geopolitical flux The past few decades have witnessed a bifurcated trend in China s management of territorial disputes Over the years while China gradually calmed and settled most land border disputes with its neighbors disputes on the ocean frontier continued to simmer in a seething cauldron China s Policy towards the South China Sea attributes the distinctive path of China s approach to maritime disputes to a unique factor the law of the sea LOS as the rules of the road in the ocean By deconstructing the concept of sovereignty and treating the LOS as an evolving regime the book

examines how the changing dynamics of the LOS regime have complicated and reshaped the nature and content of sovereign disputes in the ocean regime as well as the options of settlement Applying the findings to the South China Sea case the author traces the learning curve on which China has embarked to comprehend the complexity of the dispute accordingly and finds that it is the dynamic interaction of the law of the sea regime and the geopolitical conditions that has driven the evolution of China's South China Sea policy This book will be of great interest to students of Chinese and Asian politics international law international relations and security studies Legislative Calendar United States. Congress. House. Committee on Ways and Means, 2003 *European Rail Timetable*, 2010-11 *Framing Convergence with the Global Legal Order* Elaine Fahey, 2020-10-15 This interdisciplinary book explores the concept of convergence of the EU with the global legal order It captures the actions law making and practice of the EU as a cutting edge actor in the world promoting convergence against the grain In a dynamic twist the book uses methodology to reflect upon some of the most dramatically changing dimensions of current global affairs Questions explored include who and what are the subjects and objects of convergence as to the EU and the world How do court centric and less court centric approaches differ Can we use political science and international relations as service tools Four key themes are probed framing EU convergence global trade against convergence the EU as the exceptional internationalist and positioning convergence through methodology *Thomas Cook European Timetable*, 2004 Dispute Settlement Reports 2015: Volume 9, Pages 4571-5130 World Trade Organization, 2017-01-05 The Dispute Settlement Reports of the World Trade Organization WTO include Panel and Appellate Body reports as well as arbitration awards in disputes concerning the rights and obligations of WTO members under the provisions of the Marrakesh Agreement Establishing the World Trade Organization These are the WTO authorized and paginated reports in English They are an essential addition to the library of all practicing and academic trade lawyers and needed by students worldwide taking courses in international economic or trade law DSR 2015 Volume 9 reports on China Measures Imposing Anti Dumping Duties on High Performance Stainless Steel Seamless Tubes HP SSST from Japan WT DS454 and China Measures Imposing Anti Dumping Duties on High Performance Stainless Steel Seamless Tubes HP SSST from the European Union WT DS460 **Neues verkehrswissenschaftliches Journal - Ausgabe 22** Weiting Zhao, 2018-01-23 With the increasing traffic demand and limited infrastructure expansion railway operation becomes more susceptible to the operational disturbances In order to ensure a robust railway operation a proactive dispatching algorithm in dynamic circumstances under the consideration of random disturbances is necessary In this study an operational risk map will be firstly produced by simulating considerable amount of disturbed scenarios generated in a Monte Carlo scheme and calculating the corresponding expected negative impacts different levels of operational risk will be assigned to each block section in the investigated network Within a rolling time horizon framework conflicts are detected with the inclusion of risk oriented disturbances in each block section and the near optimal dispatching solutions are calculated by using Tabu search

algorithm Finally three indicators including total weighted waiting time the number of relative reordering and average absolute retiming are chosen to testify the effectiveness and advantages of the proposed dispatching algorithm The sensitivity analysis of dispatching related parameters is conducted afterwards to investigate the most appropriate relevant parameters for the specific studied area The proposed algorithms are expected to be capable of automatically producing near optimal and robust dispatching solutions with sufficient punctuality achieved

The South China Sea Arbitration Alfredo C. Robles,2019-01-01 The South China Sea Arbitration which marks the first time that the Philippines and China have been parties to a compulsory dispute settlement procedure is a landmark legal case The Tribunal tackled head on critical issues in the interpretation and application of the UN Convention on the Law of the Sea that other international courts have failed to address particularly the compatibility of historic rights with the Convention the identification of maritime features as permanently submerged or above water at high tide and the distinction between features that are fully entitled to maritime zones and those that are not In addition the Tribunal also had to decide on issues as diverse as near collisions at sea illegal fishing of giant clams and sea turtles and the destruction of fragile coral reefs resulting from island building The Tribunals task was rendered arduous by Chinas refusal to appear before it In these circumstances understanding the Tribunals decisions is a challenging undertaking Chinas public relations campaign targeting the proceedings raised issues that the layperson could readily grasp notably African states support for its non appearance the integrity of the judges and the validity of arbitral awards Understanding the Awards and Debating with China aims to facilitate understanding of the South China Sea Arbitration by presenting detailed summaries of the two Arbitral Awards The author rebuts the questionable claims raised by Chinas public relations campaign and highlights Chinas covert actions during the proceedings

Drowning by Accident Elizabeth Meinhard,2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation

More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don't recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place *Ernest Hemingway.
