

WHAT IS POSITIVE REINFORCEMENT?

Positive reinforcement can be one of the most effective ways to change behavior and encourage students to behave appropriately.

What is positive reinforcement?

Positive reinforcement is when you reward students, or your child for behaving appropriately. This can be done in many ways. It is so important to highlight and reward when students are doing the right thing.

What is a reinforcement assessment?

A reinforcement assessment is used to determine what a student is motivated by. It is so important that the student is the one that picks their preferred reinforcer to ensure it's motivating and individualized.

Reinforcement and bribery are two totally different things. Reinforcement is rewarding them for exhibiting the behavior you want to see. Bribery is rewarding the behavior you do not want to see. These reinforcement assessments get the students input on what they enjoy and will clearly give ideas to the individual student's reinforcers.

so that with some trepidation I moved into a full time practice I have continued to maintain my practice according to the same ethical professional and business assumptions discussed in this book One of the reasons for my writing this book is that at the time I was beginning my practice there was no one text that helped me begin or to explain what nuts and bolts issues I needed to consider As my practice has grown I continued to see a need for a resource text to help the beginning therapist get started I decided to describe the assumptions methods and issues that I have used so as to present a discussion of timely issues relevant to the practice of behavior therapy
