The Czech Republic and Economic Transition in Eastern Europe Jan Svejnar,2013-10-22 The Czech Republic and Economic Transition in Eastern Europe is the first in depth comparative analysis of the Czech Republic s economic transition after the fall of the Communist bloc Edited by Jan Svejnar a principal architect of the Czech economic transformation and Economic Advisor to President Vaclav Havel the book poses important questions about the Republic and its partners in Central and Eastern Europe The thirty five essayists describe the country s macroeconomic performance its development of capital markets the structure and performance of its industries its unemployment household behavior and income distribution and the environmental and health issues it faces In this in depth comparative analysis of the Czech Republic s economic transition an international team of thirty five economists examine the Republic and its partners in Central and Eastern Europe Important questions and issues permeate the essays For example prior to 1939 the Czech Republic possessed the most advanced economy in the region is it capable of reestablishing its dominance Relative to its neighbors the Republic ranks especially high on some transition related performance indicators but low on others What economic effects are related to the 1993 dissolution of the Czech and Slovak governments And what can be learned by comparing the economic outcomes of two countries that shared legal and institutional frameworks Data describe the country s macroeconomic performance its development of capital markets the structure and performance of its industries its unemployment household behavior and income distribution and the environmental and health issues facing it Its most important contributions are its clarifications of the transition process The

authors included in *Transforming Czechoslovakia* combine the best available data and techniques of economic analysis to assess the replacement of the inefficient but internally consistent central planning system with a more efficient market system. These authors, among whom are central European economic analysts, senior U.S. economists, and Czechoslovakian professors and economic researchers, discuss the country's macroeconomic performance, its development of capital markets, the structure and performance of its industries, its unemployment, household behavior, and income distribution, and the environmental and health issues facing it. The essays vary between presentations of history and policy and technical examinations of data. Together, they offer the most comprehensive and detailed assessment of the country's economic transformation in print. This book is important because its essayists compile results and reach conclusions that are broad and credible. The empirical data were gathered on the ground and have been subjected to advanced methodologies including game theory, industrial organization, and Granger-Sims causality.

A Journey to Nowhere Jean-Paul Kauffmann, 2013-10-01
Courland is an entity that no longer exists. With the Gulf of Riga to the north, the Baltic to the west, and Lithuania at its southern border, and now part of modern Latvia, the region was once occupied by Nazi Germany and returned to Soviet Russia after the war, remaining largely inaccessible until 1991. Once ruled by descendants of the Teutonic Knights, it is now a nowhere land of wide skies and forests, deserted beaches, ruined castles, and ex-KGB prisons. For years, Jean-Paul Kauffmann has been irresistibly drawn to this place, the buffer between the Germanic and Slav worlds. His digressive travels at the wheel of a Skoda become an investigation into the whereabouts of a former lover, a search for an excavator of tombs, and he follows in the footsteps of Louis XVIII for whom Courland was once a place of exile. Author of *Voyage to Desolation Island* and *The Dark Room at Longwood*, which won six prizes on its publication in France, Kauffmann has come to be known as an erudite and witty observer of the world's most desolate reaches.

Driving the Dragon Mark Andrews, 2025-04-15
China is now at the forefront of electric vehicle adoption, and a wave of Chinese manufactured cars is now hitting Europe and the West. As the world's largest car producer since 2008, China's automotive industry deserves a closer look. *Driving the Dragon* explores the history of Chinese car manufacture, looking at some of the important cars on that journey, the false starts, and missed opportunities. The story begins with the Rover 75 and how it played a key role in moving the Chinese car industry forward. It concludes with a look at cars from the likes of BYD, Zeekr, and Nio, which are becoming mainstream in the UK and Europe as some of the most competitive electric vehicles on the market, not just in terms of price but also performance and desirability. For many people, China is still a very enigmatic country, not helped by recent political events. While the book focuses on the automotive industry, it also looks at the country itself and examines the culture surrounding the industry. The author spent 30 years in China, teaching test driving and reviewing Chinese cars, and writing while witnessing first-hand the extraordinary growth of the Chinese car industry.
