Unlocking

The built-in warning function serves as confirmation that the vehicle has been unlocked. If the vehicle is unlocked using button of the display or the front of the vehicle, the door is unlocked, the vehicle is automatically locked again and the safe starting system or anti-theft alarm system is reactivated. This function is intended to prevent the vehicle from being unlocked unintentionally.

In addition, when the car is unlocked, the door is adjustable and the interior mirrors are automatically positioned to the key. The stored setting of the seat and mirrors is restored.

Locking

The built-in warning function serves to confirm that the vehicle has been correctly locked.

If the doors or trunk lid remain open after the vehicle has been locked, the horn signal begins to ring. The warning horn must stand.

WARNING

If the car is locked from the outside and the information system is activated, there will not be any sound in the car or the horn will continue to ring in the event of a warning function failure. The locked state is also to be avoided for passengers and the vehicle in emergency situations.
