Energy Efficiency in Buildings

José Manuel Andújar, Sergio Gómez Melgar, 2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO₂ per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed

The Magic City Captured by Miami Vice, Scarface, Movies, and Burn Notice: a guide to 80s Locations and Culture Col James Staubach, US Army Retired, 2014-04-26. This illustrated guide is unique. Fans of Miami Vice, Scarface, Burn Notice, and 80s Miami movies will appreciate it. The guide will also interest students of Miami history and Art Deco as well as those nostalgic about Miami in the 80s. It explains for the first time that these shows are really a time capsule of long-gone Miami scenes. They serve as a record of when Miami was 1980s America on steroids. Burn Notice, an innovative show in its own right, followed Miami Vice's lead. When compared to similar scenes from Vice, recent TV shows reveal the distinctiveness of the 80s. These TV shows also provide a window into today's Miami. The guide shows where views of long-gone iconic locations and typical Miami scenes can be found on the DVDs. The value of Miami Vice to South Florida is explained. Personal observations are provided by the author, who lived there during the Vice years. All music played on Miami Vice is listed, as well as key locations in all Vice movies and recent TV episodes.

Minimalism Hartmut Obendorf, 2009-06-12. The notion of Minimalism is proposed as a theoretical tool supporting a more differentiated understanding of reduction and thus forms a standpoint that allows definition of aspects of simplicity. Possible uses of the notion of minimalism in the field of human computer interaction design are examined both from a theoretical and empirical viewpoint, giving a range of results. Minimalism defines a radical and potentially useful perspective for design analysis. The empirical examples show that it has also proven to be a useful tool for generating and modifying concrete design techniques. Divided into four parts, this book traces the development of minimalism, defines the four types of minimalism in interaction design, looks at how to apply it, and finishes with some conclusions.
