the revered organization's past Jordan finds that Scouting helped to broaden mainstream American manhood by modernizing traditional Victorian values to better suit a changing nation

**Creativity and Innovation Among Science and Art** Christine Charyton, 2015-01-22 This edited book will address creativity and innovation among the two cultures of science and art. Disciplines within science and art include medicine, neurology, music therapy, art therapy, physics, chemistry, engineering, music improvisation, education, and aesthetics. This book will be the first of its kind to appeal to a broad audience of students, scholars, scientists, professionals, practitioners, physicians, psychologists, counsellors, and social workers, musicians, artists, educators, and administrators. In order to understand creativity and innovation across fields, the approach is multidisciplinary. While there is overlap across disciplines, unique domain-specific traits exist in each field and are also discussed in addition to similarities. This book engages the reader with the comparison of similarities and differences through dialog across disciplines. Authors of each chapter address creativity and innovation from their own distinct perspective. Each chapter is transdisciplinary in approach. These perspectives entail a representation of their field through research, teaching, service, and/or practice.

**Encyclopedia of Television Subjects, Themes and Settings** Vincent Terrace, 2024-10-17 Over the course of 80 years, television has produced countless programs, many of which fit a particular profile. Did you know, for example, some programs are devoted to ghosts, genies, angels, and even mermaids? Color broadcasting was first tested in 1941. Live models were used to advertise lingerie as early as 1950. Or that nudity, although accidental, occurred on TV long before cable was even thought possible. These are just a few of the many facts and firsts that can be found within the 145 entries included. Appropriate for fans and scholars and bursting with obscure facts, this work traces the evolution of specific topics from 1925 through the 2005-2006 season. Entries include such diverse themes as adolescence, adult film actresses on TV, bars, espionage, gays, immigrants, lawyers, transsexuals, and truckers, as well as locations like Canada, Hawaii, New York, and Los Angeles. Each entry is arranged as a timeline, clearly displaying how television's treatment of the subject has changed through the years. Each entry is as complete as possible and contains series, pilot, special, and experimental program information. Whether just a fan of television and eager to know more about the medium or a scholar seeking hard-to-find facts and information, this book traces the history of specific topics from television's infancy to its changes in the early twenty-first century.
