**Slide Rule. The Autobiography of an Engineer. [With a Portrait.]** Nevil Shute,1966 *His Majesty's Airship* S C Gwynne,2024-05-21 The tragic story of the British airship R101 which went down in a spectacular hydrogen fueled fireball in 1930 killing more people than died in the Hindenburg disaster seven years later has been largely forgotten In *His Majesty's Airship* historian S C Gwynne resurrects it in vivid detail telling the epic story of great ambition gone terribly wrong Airships those airborne leviathans that occupied center stage in the world in the first half of the twentieth century were a symbol of the future R101 was not just the largest aircraft ever to have flown and the product of the world s most advanced engineering she was also the lynchpin of an imperial British scheme to link by air the far flung areas of its empire from Australia to India South Africa Canada Egypt and Singapore No one had ever conceived of anything like this R101 captivated the world There was just one problem beyond the hype and technological wonders these big steel framed hydrogen filled airships were a dangerously bad idea Gwynne s chronicle features a cast of remarkable and often tragically flawed characters including Lord Christopher Thomson the man who dreamed up the Imperial Airship Scheme and then relentlessly pushed R101 to her destruction Princess Marthe Bibesco the celebrated writer and glamorous socialite with whom he had a long affair and Herbert Scott a national hero who had made the first double crossing of the Atlantic in any aircraft in 1919 eight years before Lindbergh s famous flight but who devolved into drink and ruin These historical figures and the ship they built flew and crashed come together in a grand tale that details the rocky road to commercial aviation written by one of the best popular historians writing today **Everything Must Go** Dorian Lynskey,2025-01-28 A rich captivating and darkly humorous look into the evolution of apocalyptic thought exploring how film and literature interact with developments in science politics and culture and what factors drive our perennial obsession with the end of the world As Dorian Lynskey writes People have been contemplating the end of the world for millennia In this immersive and compelling cultural history Lynskey reveals how religious prophecies of the apocalypse were secularized in the early 19th century by Lord Byron and Mary Shelley in a time of dramatic social upheaval and temporary climate change inciting a long tradition of visions of the end without gods With a discerning eye and acerbic wit Lynskey examines how various doomsday tropes and predictions in literature art music and film have arisen from contemporary anxieties whether they be comets pandemics world wars the Cuban Missile Crisis Y2K or the climate emergency Far from being grim Lynskey guides readers through a rich array of

understandings of the rules of the games      An Engineer's Alphabet Henry Petroski,2011-10-10 Written by America's most famous engineering storyteller and educator this abecedarium is one engineer's selection of thoughts quotations anecdotes facts trivia and arcana relating to the practice history culture and traditions of his profession The entries reflect decades of reading writing talking and thinking about engineers and engineering and range from brief essays to lists of great engineering achievements This work is organized alphabetically and more like a dictionary than an encyclopedia It is not intended to be read from first page to last but rather to be dipped into here and there as the mood strikes the reader In time it is hoped this book should become the source to which readers go first when they encounter a vague or obscure reference to the softer side of engineering      **The Tender Ship** SQUIRES,2013-03-14 Unsurprisingly Arthur Squires presents us with a remarkable book Unsurprisingly because this is a remarkable man accomplished engineer gifted musician sensitive humanist talented teacher analytical observer felicitous writer altogether a man with the kind of breadth and depth that we rarely produce these days and even more rarely tolerate in an age that worships specialization Professor Squires has done a great many things in his life and has thought deeply about his experiences The book that follows radiates not only that ongoing process of reflection but also a dazzling range of reading and a lifetime of conversations with colleagues and bosses mentors and students wise men and fools What he has produced is that rare specimen indeed a book that is a pleasure to read and that needs to be read by every informed citizen The Tender Ship focuses on the intersection of the most vital questions that confront American society or indeed any modern industrial society however defined No historical example exists of a society that has reached such a status without creating bureaucracies to manage its public and private sectors Maintenance of national well being depends at least in part on a nation's ability to generate and adopt the technology necessary to maintain economic competitiveness and in the case of the United States a credible force with which to defend ourselves and our allies      **Successful Management in the Digital Age** John Harte,2017-07-05 Successful Management in the Digital Age examines key factors for success in today's business environment finding markets being vigilant for new trends and changes exploiting opportunities and overcoming obstacles While acknowledging the benefits of technological advances in some areas John Harte shows how artificial intelligence is limited and often imperfect Becoming thoughtlessly dependent on it may replace the far more rewarding benefits of human ingenuity creativity and innovation For Harte organizational complacency is one of the prime causes of business inertia It often results from past successes that create an illusion of wisdom and invulnerability which blinds leaders to warning signs De industrialization is just one example of a movement that led to the present market stagnation Harte reminds executives and entrepreneurs of the basic formula for success in any business producing a product or service that people want and providing it at the right time for the right price in order to make a suitable profit He warns us to resist temptations of the digital era such as automation that results in over production and market saturation outsourcing that risks losing customers and losing control of brands and markets by
