America Gary Weiss,2007-05-29 A shocking appraisal that shows how Wall Street is intrinsically corrupt and what individual investors can do to protect themselves For several years high profile corporate wrongdoers have been vilified by the media Yet the problem according to Gary Weiss is not just a few isolated instances of malfeasance The problem is in the very fabric of Wall Street and its practices that enable and even encourage corruption practices that are so pervasive and so difficult to combat that they are in effect perfect crimes with the small investor left holding the bag In this blistering report from the front Weiss describes how the ethos of Mafia chophouses boiler rooms and penny stock peddlers now permeates all of Wall Street Protected from investor lawsuits by laughably corrupt arbitration systems Wall Street firms are free to fleece unsuspecting clients with little or no risk But as this empowering book shows ordinary investors can fight back and come out on top if they learn to recognize warning signs filter media chatter and spot looming corporate meltdowns in advance Prepare to be surprised get angry and then get even Wall Street Versus America is a wild ride you can t afford to miss

Procyclical Behavior of Institutional Investors During the Recent Financial Crisis Mr.Michael G Papaioannou,Mr.Joonkyu Park,Jukka Pihlman,Han van der Hoorn,2013-09-11 This paper i

provides evidence on the procyclical investment behavior of major institutional investors during the global financial crisis ii identifies the main factors that could account for such behavior iii discusses the implications of procyclical behavior and iv proposes a framework for sound investment practices for long term investors Such procyclical investment behavior is understandable and may be considered rational from an individual institution's perspective However our main conclusion is that behaving in a manner consistent with longterm investing would lead to better long term risk adjusted returns and importantly could lessen the potential adverse effects of the procyclical investment behavior of institutional investors on global financial stability

Transnational Constitution Making Alicia Pastor y Camarasa,2024-06-14 This book examines the largely neglected but crucial role of transnational actors in democratic constitution making The writing or rewriting of constitutions is usually a key moment in democratic transitions But how exactly does this take place Most contemporary comparative constitutional literature draws on the concept of constituent power the power of the people to address this moment But what this overlooks this book argues is the important role of external transnational actors who tend to play a crucial role in the process Drawing on sociolegal methodologies but informed by new legal realism this book develops a new theoretical framework for examining the involvement of such actors in constitution making Empirically grounded the book uncovers a more comprehensive picture of how constitution making unfolds on the ground Illuminating the power dynamics at play during the legal process it reveals not only the wide range of external actors involved but also the continuity between decolonisation and post Cold War constitution making This book the first to provide an in depth examination of external actor involvement in constitution making will appeal to scholars of constitutional law sociolegal studies law and development and transitional justice

Great Games, Local Rules Alexander Cooley,2012-07-23 The struggle between Russia and Great Britain over Central Asia in the nineteenth century was the original great game But in the past quarter century a new great game has emerged pitting America against a newly aggressive Russia and a resource hungry China all struggling for

influence over the same region now one of the most volatile areas in the world the long border region stretching from Iran through Pakistan to Kashmir In Great Games Local Rules Alexander Cooley one of America s most respected international relations scholars explores the dynamics of the new competition for control of the region since 9 11 All three great powers have crafted strategies to increase their power in the area which includes Afghanistan and the former Soviet republics of Turkmenistan Uzbekistan Kyrgyzstan and Kazakhstan Each nation is pursuing important goals basing rights for the US access to natural resources for the Chinese and increased political influence for the Russians However overlooked in all of the talk about this new great game is fact that the Central Asian governments have proven themselves critical agents in their own right establishing local rules for external power involvement that serve to fend off foreign interest As a result despite a decade of intense interest from the United States Russia and China Central Asia remains a collection of segmented states and the external competition has merely reinforced the sovereign authority of the individual Central Asian governments A careful and surprising analysis of how small states interact with great powers in a vital region Great Games Local Rules greatly advances our understanding of how global politics actually works in the contemporary era

Local Politics in Indonesia

Nankyung Choi,2012-02-20 Despite only a decade of democratic reform elections and political parties have become so embedded in Indonesia s political life that both Indonesians and foreign observers seem to have no difficulty in crediting Indonesia as the world s third largest democracy This book explores how local elections have affected Indonesia s democracy and political dynamics

Nuclear Proliferation and International Security Sverre Lodgaard,Bremer Maerli,2007-06-11

The Nuclear Non Proliferation Treaty has long been key in non proliferation and disarmament activities The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities In retrospect and despite setbacks the overall impact of the Nuclear Non Proliferation Treaty has been significant and gratifying Its continued success is by no means guaranteed As old nuclear dangers persist and new ones evolve policies to halt nuclear proliferation are more disparate than at any other time Nuclear weapons remain an essential part of the security policies of leading states and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities In search of an overarching strategy that recognizes both the flaws of the existing non proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty

International Dimensions of Authoritarian

Persistence Rachel Vanderhill,Michael E. Aleprete Jr.,2013-07-19 While the international system has been evolving in an increasingly liberal direction the level of democratic practice within the post Soviet region has on the whole declined Two

decades after the popular uprisings against communism many governments in the region have successfully blunted both popular and international pressures for democratic consolidation Each selection in this volume explores how international factors interact with domestic conditions to explain the persistence of authoritarianism throughout the region The selections in the volume cover several countries including Azerbaijan Kazakhstan Uzbekistan South Ossetia Ukraine Moldova and Belarus special attention is paid to the Russian Federation since it is both a member of the region and acts as an external actor influencing the political development of its neighbors This volume is especially relevant as the world again experiences the surprising overthrow of long running authoritarian regimes The failure of democratic consolidation among post Soviet states offers important lessons for policymakers and academics dealing with the recent wave of political transitions in the Middle East and Asia

The Routledge Handbook of Ethnic Conflict Karl Cordell, Stefan Wolff, 2016-01-22 A definitive global survey of the interaction of ethnicity nationalism and politics this handbook blends rigorous theoretically grounded analysis with empirically rich illustrations to provide a state of the art overview of the contemporary debates on one of the most pervasive international security challenges today Fully updated for the second edition the book includes a new section which offers detailed analyses of contemporary cases of conflict such as in Ukraine Kosovo the African Great Lakes region and in the Kurdish areas across the Middle East thus providing accessible examples that bridge the gap between theory and practice The contributors offer a 360 degree perspective on ethnic conflict from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict and to the various strategies adopted in response to it Without privileging any specific explanation of why ethnic conflict happens at a particular place and time or why attempts at preventing or settling it might fail or succeed The Routledge Handbook of Ethnic Conflict enables readers to gain a better insight into such defining moments in post Cold War international history as the disintegration of the Soviet Union and Yugoslavia and their respective consequences the genocide in Rwanda and the relative success of conflict settlement efforts in Northern Ireland By contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of their prevention and settlement the Handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable but rather that they require careful analysis and thoughtful and measured responses
