Kriz, William Cartwright, Lorenz Hurni, 2010-09-15 This book is the outcome of the work of contributors who participated in the workshop Mapping Different Geographies MDG in February 2010 held in Puchberg am Schneeberg Austria This meeting brought together cartographers artists and geoscientists who research and practice in applications that focus on enhancing communication or develop and evaluate methodologies that provide innovative methods for sharing information The main intention of the workshop was to investigate how different geographies are being mapped and the possibilities for developing new theories and techniques for information design and transfer based on place or location So as to communicate these concepts it was important to appreciate the many contrasting meanings of mapping that were held by workshop participants Also the many and varied viewpoints of what different geographies are were elaborated upon and discussed Therefore as the focus on space and time was embedded within everyone's fields of investigation this was addressed during the workshop This resulted in very engaging discourse which in some cases exposed the restrictions that certain approaches need to consider For participants this proved to be most useful as this allowed them to appreciate the limits and restrictions of their own approach to understanding and representing different geographies As well the workshop also was most helpful as a vehicle for demonstrating the common ground of interest held by the very diverse areas of endeavour that the workshop participants work within
