Health

Education Keith Tones, Yvonne Keeley Robinson, Sylvia Tilford, 2013-11-11 It could be said with some justification that the task of education is to safeguard people's right to learn about important aspects of human culture and experience. Since health and illness occupy a prominent place in our everyday experience, it might reasonably be argued that everyone is entitled to share whatever insights we possess into the state of being healthy and to benefit from what might be done to prevent and treat disease and discomfort. Health education's role in such an endeavour would be to create the necessary understanding. No other justification would be needed. In recent years, however, questions have been posed with increasing insistence and urgency about efficiency both about education in general and health education in particular. We can be certain that such enquiries about effectiveness do not reflect a greater concern to know whether or not the population is better educated; they stem from more utilitarian motives. It is apparent even to the casual observer that economic growth and productivity have become a central preoccupation in contemporary Britain. Unwinding Madness Gerald S. Gurney, Donna A. Lopiano, Andrew Zimbalist, 2016-12-13 A critical look at the tension between the larger role of the university and the commercialization of college sports. Unwinding Madness is the most comprehensive examination to date of how the NCAA has lost its way in the governance of intercollegiate athletics and why it is incapable of achieving reform and must be replaced. The NCAA has placed commercial success above its responsibilities to protect the academic primacy, health and well-being of college athletes and fallen into an educational, ethical and economic crisis. As long as intercollegiate athletics reside in the higher education environment, these programs must be academically compatible with their larger institutions, subordinate to their educational mission and defensible from a not-for-profit organizational standpoint. The issue has never been a matter of whether intercollegiate athletics belongs in higher education as an extracurricular offering. Rather, the perennial challenge has been how these programs have been governed and conducted. The authors propose detailed solutions starting with the creation of a new national governance organization to replace the NCAA. At the college level, these proposals will not diminish the revenue production capacity of sports programs but will restore academic integrity to the enterprise, provide fairer treatment of college athletes with better health protections and restore the rights and freedoms of athletes which have been taken away by a professionalized athletics mentality that controls the cost of its athlete labor force and overpays coaches and athletic directors. Unwinding Madness recognizes that there is no easy fix to the problems now facing college athletics. But the book does offer common-sense, doable solutions that respect the rights of athletes, protect their health and well-being while delivering on the promise of a bona fide educational degree program. **Ahead of the Game** Ken Ungar, 2007-12 Each week 52 million kids take to America's gymnasiums, playing fields and race tracks. Many of them dream of becoming the next sports superstar. While they train for countless hours to get to the top, sacrifice and dedication are often not enough. Young athletes have no idea that a different field of competition awaits them down the road: the game of professional sports business. Without adequate preparation for this winner-takes-all industry, athletes risk derailing an
