Kuhlman, 2021-07-01 This guide book started out as a simple code basics guide for my own employees at Kuhlman Electric in Massachusetts and New Hampshire I was finding that when we wired a detached garage or something else we didn't do all the time there would be some confusion on how to do it properly what the codes were etc I'm all about training at my own company and came up with a guide that would cover all these situations My employees could keep it in their trucks and pull it out when needed For example if they were going to install a Tesla charger next week they could reference the section in this guide book to refresh their memory This early company guide morphed into Residential Electrician Field Guide This guide includes many of the important residential codes explained in a normal non lawyer talk way One of the most frustrating things about our National Electrical Code book is that it is hard to read My goal was to break down the codes and explain them in simplest fashion possible This guide is over 200 pages including over 75 diagrams and tables Some of the items included in this guide NEC 2020 code changes Under ground wiring Detached garage wiring New work and old wiring wiring installations Arc Fault protection GFCI protection Related codes to lighting and outlets throughout all different rooms in a house EV charger installations Service upgrade installations Load Calculations Knob and tube inspections HVAC wiring
