employees diversity and discrimination in the workplace marketing and disclosure of information ethical issues in information technology and ethical issues in international business Moral and Political Reasoning in Environmental Practice Andrew Light, Avner De-Shalit, 2003 Essays showing how environmental philosophy can have an impact on the world by integrating abstract reasoning with actual environmental practice **Environmental Philosophy** Hugh P. McDonald, 2014-05-10 Environmental Philosophy A Revaluation of Cosmopolitan Ethics from an Ecocentric Standpoint calls for a new approach to ethics Starting from the necessity for all life of air water and food the book revalues the relation of ethics and environmentalism Using insights of the environmental ethicists environmental ethics becomes the model for ethics as a whole Humans are part of a larger environment Cosmopolitanism should be revised in accord with environmental ethics The book applies a new theory of values to the relation of value and obligation and of duty rights and virtue to accord with ecocentrism The book also critically evaluates Utilitarianism and the self interest theory Other chapters address population species preservation and a practical program for environmental policy **Environmental Science** George Tyler Miller, 1999 Open this book turn on your computer and get ready for an eye opening journey of discovery You ll be surprised at how fascinating the study of environmental science can be How heated the debate How interconnected the issues have become And how much you can learn from one very current and unbiased book This seventh edition of Miller s Environmental Science is both a learning experience and a gateway to the most current discoveries in the field today As you read you ll be encouraged to explore specific internet sites and online magazines to keep abreast of the latest research Along with your expanding knowledge you ll develop your own informed views about critical environmental issues **Kindness In A Cruel World** Nigel Barber, 2010-10-04 What do mutual grooming politeness priestly celibacy military heroism car insurance and overwork have in common All are probable examples of the recently discovered evolutionary mechanism called reciprocal altruism Put simply the concept means You scratch my back and I ll scratch yours Although rare in animals reciprocal altruism colors much of human emotion and social behavior Over the course of our evolutionary history we humans have developed a great variety of social contracts ranging from food sharing among hunter gatherers to observing the rules of the road in contemporary society In a lively fascinating discussion that explores the behaviors of bees bats and humans in various normal and deviant social settings evolutionary psychologist Nigel Barber explains the evolutionary basis of these wide ranging phenomena Beginning with Darwin s theory Barber shows how the original notion of a dog eat dog world where survival of the fittest is the only rule must now be modified by the new findings on altruism In bees for example the workers evolve without reproductive ability and exist only for the good of the hive and the propagation of the queen bee s genes In addition vampire bats will spontaneously share food through regurgitation evidently so that the favor will be returned when food sources are scarce In humans reciprocal arrangements depend on trust so moral emotions like guilt embarrassment resentment and pride have evolved to guard against the temptation to cheat which would destroy the basis of

trust on which so much depends The evolution of such emotions may also lead to exceptionally self sacrificial behavior in some individuals whether this takes the form of priestly celibacy a soldier jumping on a hand grenade to save his buddies or the donation of a kidney Barber brings the revealing insights of evolutionary psychology to these examples and more and delves into related issues including sex differences in kindness new approaches to rehabilitating criminals the connection of kindness to health and the political manifestations of altruism in the environmental movement Full of stimulating ideas expressed in lucid prose *Kindness in a Cruel World* presents a compelling case that the desire to help others and the spirit of cooperation are fundamental to our human evolutionary inheritance
