

## Waves

## Answer Key

**Vocabulary:** amplitude, compression, crest, frequency, linear mass density, longitudinal wave, medium, period, power, rarefaction, transverse wave, trough, wave, wavelength, wave speed

**Prior Knowledge Questions** (Do these BEFORE using the Gizmo.)

*[Note: The purpose of these questions is to activate prior knowledge and get students thinking. Students are not expected to know the answers to the Prior Knowledge Questions.]*

1. A buoy is anchored to the ocean floor. A large wave approaches the buoy. How will the buoy move as the wave goes by?

*Answers will vary. [The buoy will move up and down and back and forth, tracing a circular motion, as the wave passes.]*

2. The two images show side views of ocean waves. How are the two sets of waves different?

*Sample answer: The waves in the left image are closer together and higher than the waves in the right image. The tops (crests) of the waves on the left are pointier.*

### Gizmo Warm-up

Ocean swells are an example of **waves**. In the Waves Gizmo, you will observe wave motion on a model of a spring. The hand can move the spring up and down or back and forth.

To begin, check that the **Type of wave** is **Transverse**, **Amplitude** is 20.0 cm, **Frequency** is 0.75 Hz, **Tension** is 3.0 N, and **Density** is 1.0 kg/m. (Note: In this Gizmo, "density" refers to the **linear mass density**, or mass per unit length. It is measured in units of kilograms per meter.)

1. Click **Play** (▶). How would you describe the motion of a **transverse wave**? *The coils of the spring model move up and down as the wave goes from left to right.*

Click **Pause** (⏸). Notice the **crests** (high points) and **troughs** (low points) of the wave.

2. Click **Reset** (↺). Choose the **Longitudinal** wave and increase the **Amplitude** to 20.0 cm. Click **Play**. How would you describe the motion of a **longitudinal wave**?

*The coils of the spring model move back and forth as the wave goes from left to right.*

Click **Pause**. Notice the **compressions** in the wave where the coils of the spring model are close together and the **rarefactions** where the coils are spread apart.

Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten, expanded, and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research, including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross-disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community. Breaking the Wave: Women, Their Organizations, and Feminism, 1945-1985 Kathleen A. Laughlin, Jacqueline Castledine, 2012-12-06 Breaking the Wave is the first anthology of original essays by both younger and established scholars that takes a long view of feminist activism by systematically examining the dynamics of movement persistence during moments of reaction and backlash. Ranging from the civic feminism of white middle-class organizers and the womanism of Harlem consumers in the immediate postwar period to the utopian feminism of Massachusetts lesbian softball league founders and environmentally minded feminists in the 1970s and 1980s, Breaking the Wave documents a continuity of activism in both national and local organizing that creates a new discussion and a new paradigm for twentieth-century women's history. Contributors: Jacqueline L. Castledine, Susan K. Freeman, Julie A. Gallagher, Marcia Gallo, Sally J. Kenney, Rebecca M. Kluchin, Kathleen A. Laughlin, Lanethea Mathews, Catherine E. Rymph, Julia Sandy Bailey, Jennifer A. Stevens, Janet Weaver, and Leandra Zarnow. VR Learning Wave T.S. Avini, 2025-08-07 VR Learning Wave: Revamp Education Through VR Technology is a groundbreaking examination of how Virtual Reality (VR) is reshaping the educational landscape. Imagine a classroom where students can traverse ancient civilizations or dive into the depths of the ocean without leaving their seats. This book explores the potential of VR to make learning a truly transformative experience. Discover how VR can enhance not just traditional learning but also special education and vocational training. Uncover practical insights into designing effective VR educational content and preparing teachers for this new educational paradigm. Dive into case studies demonstrating successful VR implementations in schools and learn how to overcome challenges like accessibility and cost. This book also addresses the ethical considerations of using VR in education, equipping you with a comprehensive understanding needed to embrace this technological wave. Unlock the future of learning. Join the VR educational revolution today. Textbook of Pharmacology-II (As per PCI regulations and for medical students) Prof. Dr. V. K. Kalaichelvan, Dr. V. Jenila Jose Jancy, Mr. Sabarinath Chandrasekar, Dr. Ashish Manigauha, Ms. R. Abinaya, 2025-03-25 Pharmacology is the study of how drugs interact with biological systems, playing a

pivotal role in understanding disease mechanisms and treatment The content is designed to guide students healthcare professionals and researchers through more complex therapeutic classes drug interactions and the evolving landscape of pharmacological research In this book we explored the pharmacodynamics and pharmacokinetics of various drug classes as well as their clinical applications and adverse effects Additionally we address recent advances in molecular pharmacology including personalized medicine and the role of biotechnology in drug development By integrating case studies and real world examples we aim to enhance practical understanding and foster critical thinking in applying pharmacological principles to clinical practice

Rethinking College Student Development Theory Using Critical Frameworks Elisa S. Abes, Susan R. Jones, D-L Stewart, 2023-07-03 A major new contribution to college student development theory this book brings third wave theories to bear on this vitally important topic The first section includes a chapter that provides an overview of the evolution of student development theories as well as chapters describing the critical and poststructural theories most relevant to the next iteration of student development theory These theories include critical race theory queer theory feminist theories intersectionality decolonizing indigenous theories and crip theories These chapters also include a discussion of how each theory is relevant to the central questions of student development theory The second section provides critical interpretations of the primary constructs associated with student development theory These constructs and their related ideas include resilience dissonance socially constructed identities authenticity agency context development consistency coherence stability and knowledge sources of truth and belief systems Each chapter begins with brief personal narratives on a particular construct the chapter authors then re envision the narrative s highlighted construct using one or more critical theories The third section will focus on implications for practice Specifically these chapters will consider possibilities for how student development constructs re envisioned through critical perspectives can be utilized in practice The primary audience for the book is faculty members who teach in graduate programs in higher education and student affairs and their students The book will also be useful to practitioners seeking guidance in working effectively with students across the convergence of multiple aspects of identity and development

Seismic Wave Theory Edward S. Krebes, 2019-03-28 Perfect for senior undergraduates and first year graduate students in geophysics physics mathematics geology and engineering this book is devoted exclusively to seismic wave theory The result is an invaluable teaching tool with its detailed derivations of formulas clear explanations of topics exercises along with selected answers and an additional set of exercises with derived answers on the book s website Some highlights of the text include a review of vector calculus and Fourier transforms and an introduction to tensors which prepare readers for the chapters to come and a detailed discussion on computing reflection and transmission coefficients a topic of wide interest in the field a discussion in later chapters of plane waves in anisotropic and anelastic media which serves as a useful introduction to these two areas of current research in geophysics Students will learn to understand seismic wave theory through the book s clear and concise pedagogy

**The Influence of Teacher-Student Relationships and Feedback on Students' Engagement with Learning** Roger Wood, 2018-06-11 This book presents a potential hierarchy between the three basic psychological needs central to Self-Determination Theory (SDT) Findings from the author's research suggest that the motivation to exercise autonomy is an outcome that is cumulatively influenced by the perceived quality of the teacher-student relationship and students' perceived competence within specific learning contexts and with a specific teacher These findings are the basis for three hypotheses regarding students' motivation to engage with learning activities The first is that perceived competence is informed by and reciprocally informs the quality of the teacher-student relationship The second is that students' perceived competence and the quality of the teacher-student relationship have a combined impact upon students' autonomous motivation The final point is that a teacher can be autonomy supportive both prior to and

during activities where students have opportunities to exercise their autonomy Such autonomy support includes the influence of teacher feedback upon students perceived competence and their subsequent motivation to autonomously engage with learning activities This research begins to unravel such motivational interplay through an SDT informed model which is used as the basis for discussing the specific influence of teacher feedback and autonomy support upon students engagement with learning activities in formal learning settings The findings and model are worthy of further testing and development as part of the wider agenda of student engagement wellbeing and positive psychology prevalent in educational research education psychology and the philosophy of social motivation

When Crime Waves Vincent Sacco, 2005-05-11 Despite its wide usage the concept of the crime wave has rarely been given explicit and detailed attention by criminologists It is important that we understand where they come from how they develop and what their consequences are When Crime Waves offers an in depth exploration of a large number of social issues involved in the study of crime waves Issues such as how and why crime rates change over time why some types of crime and not others come in waves and the role played by the mass media politicians and interest group leaders in the promotion of crime waves are discussed to help students develop analytical skills and apply them to real world situations Key Features Critically examines the phenomenon of crime waves in an engaging fashion Provides multiple perspectives via historical and contemporary examples throughout the book Delves into the role played by politicians and the media in creating the perception that a crime wave has occurred Presents themes of myth making cultural imagery and social constructionism When Crime Waves is intended to be a supplementary text for undergraduate criminology and sociology courses including Introduction to Criminology and Criminal Justice Crime when and where crimes occur and what contributes to the views on crime held by the police lawmakers and members of the general public

*Identity Interconnections* Aerial A. Ashlee, Lisa Delacruz Combs, 2023-07-03 Co published with This book advocates an approach the authors call Identity Interconnections as a way of moving considerations of identity differences and commonalities from theory to socially just action in student affairs practice Through pursuing complex commonalities expansive enough to hold both similarities and differences student affairs educators can ethically consider identity interconnections in such a way that does not diminish difference but instead recognizes points of difference as opportunities for social justice action By pursuing radical interconnectivity student affairs educators can advance an interdependent understanding of inherited systems of power recognizing the ways in which all systems and thus all oppression and all liberation are interconnected This interconnected insight can enable student affairs educators to extend beyond binary and oppositional thinking and in turn give rise to the formation of new coalitions Finally by listening with raw openness allowing themselves and encouraging their students to be changed by others experiences student affairs educators can facilitate identity development and social justice action as interrelated endeavors The editors have heard comments like This is all great in theory but how can student affairs practitioners actually apply this This book answers that question by providing a

theoretical framework and multiple practical examples for employing identity interconnections as expansive approaches to identity development and social justice action in student affairs      **Case Studies for Student Development Theory** Jason C.
