Polygynous Marriages among the Kyrgyz Michele E. Commercio,2022-12-06 During Soviet rule the state all but imposed atheism on the primarily Islamic people of Kyrgyzstan and limited the tradition of polygyny a form of polygamy in which one man has multiple wives Polygyny did continue under communism though chiefly under concealment In the decades since the fall of the Soviet Union the practice has reemerged Based on extensive fieldwork Polygynous Marriages among the Kyrgyz argues that this marriage practice has become socially acceptable and widely dispersed not only because it is rooted in customary law and Islamic

practice but because it can also enable men and women to meet societal expectations and solve practical economic problems that resulted from the fall of the Soviet Union Michele E Commercio's analysis suggests the normalization of polygyny among the Kyrgyz in contemporary Kyrgyzstan is due both to institutional change in the form of altered governmental rules and expectations and to institutional endurance in the form of persistent hegemonic constructions of gender *Kassandra and the Censors* Karen Van Dyck, 2018-05-31 In this pioneering study of contemporary Greek poetry Karen Van Dyck investigates modernist and postmodernist poetics at the edge of Europe She traces the influential role of Greek women writers back to the sexual politics of censorship under the dictatorship 1967-1974 Reading the effects of censorship in cartoons the dictator's speeches the poetry of the Nobel Laureate George Seferis and the younger generation of poets she shows how women poets use strategies which although initiated in response to the regime's press law prove useful in articulating a feminist critique In poetry collections by Rhea Galanaki Jenny Mastoraki and Maria Laina among others she analyzes how the censors' tactics for stabilizing signification are redeployed to disrupt fixed meanings and gender roles As much a literary analysis of culture as a cultural analysis of literature her book explores how censorship consumerism and feminism influence contemporary Greek women's poetry as well as how the resistance to clarity in this poetry trains readers to rethink these cultural practices Only with greater attention to the cultural and formal specificity of writing Van Dyck argues is it possible to theorize the lessons of censorship and women's writing *Cervical Cancer Control in Latin America and the Caribbean* Angelica Nogueira-Rodrigues, Lucely Cetina-Pérez, Mauricio Maza, 2024-09-27 Worldwide more than half a million women are diagnosed with cervical cancer annually and more than 300 000 die from the disease At least 85% of the deaths occur in low middle income countries LMICs and almost 10% of them in Latin America LATAM and the Caribbean where mortality rates are almost five times higher than in high income areas Infection with high risk subtypes of the Human Papillomavirus HPV is a necessary but not sufficient cause of cervical cancer The natural history of the disease involves persistent high risk HPV infections followed by the development of precancerous cervical lesions and progression to invasive cervical cancer in a process that usually occurs throughout many years The long natural history of the disease provides a window of opportunity for secondary prevention with screening tests which identify women infected with HPV or with cytologic abnormalities indicative of precancerous lesions These lesions can be successfully treated when diagnosed early Besides the existence of a primary infectious etiologic agent allows for primary prevention with prophylactic HPV vaccines capable of reducing the incidence of causative infections Thus cervical cancer is considered a preventable and treatable disease but despite that it continues to be the third cause of cancer in women in the region [Annual Report of the Bureau of American Ethnology to the Secretary of the Smithsonian Institution](#), 1915 Annual report of the Bureau of ethnology to the Secretary of the Smithsonian Institution **Annual Report of the Bureau of American Ethnology to the Secretary of the Smithsonian Institution** Smithsonian Institution. Writing Pregnancy in Low-Fertility Japan Amanda C. Seaman,2016-12-31 Writing Pregnancy in Low Fertility Japan is a wide ranging account of how women writers have made sense and nonsense of pregnancy in postwar Japan While earlier authors such as Yosano Akiko had addressed the pain and emotional complexities of childbearing in their poetry and prose the topic quickly moved into the literary shadows when motherhood became enshrined as a duty to state and sovereign in the 1930s and 40s This reproductive imperative endured after World War II spurred by a need to create a new generation of citizens and consumers for a new peacetime nation It was only in the 1960s in the context of a flowering of feminist thought and activism that more critical and nuanced appraisals of pregnancy and motherhood began to appear In her fascinating study Amanda C Seaman analyzes the literary manifestations of this new critical approach in the process introducing readers to a body of work notable for the wide range of genres employed by its authors including horror and fantasy short stories novels memoir and manga the many political personal and social concerns informing it and the diverse creative approaches contained therein This pregnancy literature Seaman argues serves as an important yet rarely considered forum for exploring and debating not only the particular experiences of the pregnant mother to be but the broader concerns of Japanese women about their bodies their families their life choices and the meaning of motherhood for individuals and for Japanese society It

will be of interest to scholars of modern Japanese literature and women's history as well as those concerned with gender studies, feminism and popular culture in Japan and beyond
