How to Live Forever Maurice S. Rawlings, Maurice Rawlings, 2008-11 Barring devastating accidents and disseminated cancer man usually dies because of the failure of just one organ Theoretically through progressive replacement of failing organs man could live forever and veritably spout the fountain of youth for the first time in history However a critical four hour survival time between organ donor and recipient is a limiting factor for making organ replacement feasible To start the fountain flowing to offer transplantation on demand and to anticipate over flowing demands would require one of the greatest discoveries of the decade a simple means for organ preservation Through meticulous research and happenstance Dr Frederick Middleton does indeed discover a unique freeze dry formula to preserve organs without fracturing the cell walls so invariably typical of any freezing or thawing process But as with all things good a

profiteering underworld soon corrupts the organ exchange business garnering fortunes from trusting recipients who hopefully would give most anything they own for one just more fling at life Within this milieu this struggle for life lies a stream of patients whose heart rending stories question traditional concepts for dealing with the dying

How to Begin to Live Forever Joseph Merlin Hodson,1893 How to Live Forever Colin Thompson,2012 Peter lives with his mother and grandfather in the museum which has the most weird and wonderful exhibits and a hundred secret doors When his grandfather gets sick Peter decides to search for his long lost father Instead he finds a strange old woman who gives him a book called How To Live Forever but makes him promise never to read it Trapped in a world where books are houses Peter meets a girl called Festival and together they look for the Ancient Child who has the answers to everything

Should You Choose to Live Forever? Stephen Cave,John Martin Fischer,2023-11-22 In this book Stephen Cave and John Martin Fischer debate whether or not we should choose to live forever This ancient question is as topical as ever while billions of people believe they will live forever in an otherworldly realm billions of dollars are currently

being poured into anti ageing research in the hope that we will be able to radically extend our lives on earth But are we wise to wish for immortality What would it mean for each of us as individuals for society and for the planet In this lively and accessible debate the authors introduce the main arguments for and against living forever along with some new ones They draw on examples from myth and literature as well as new thought experiments in order to bring the arguments to life Cave contends that the aspiring immortalist is stuck on the horns of a series of dilemmas such as boredom and meaninglessness or overpopulation and social injustice Fischer argues that there is a vision of radically longer lives that is both recognizably human and desirable This book offers both students and experienced philosophers a provocative new guide to a topic of perennial importance

Key Features Gives a comprehensive overview of the main arguments for and against living forever Uses lively examples from myth literature and novel thought experiments Highly accessible avoiding jargon and assuming no prior knowledge without sacrificing intellectual rigour Includes helpful pedagogical features including chapter summaries an annotated reading list a glossary and clear examples
