Supernatural premiered on September 14 2005 on what was then called the WB Network Creator Eric Kripke was inspired by Jack Kerouac's On The Road putting his heroes brothers Sam and Dean Winchester in a big black 67 Impala and sending them in search of the urban legends that fascinated him The series attracted a passionate fan base from the start and was described as a cultural attractor that tapped into the zeitgeist of the moment reflecting global fears of terrorism with its themes of fighting unseen evil The chemistry between the lead actors Jared Padalecki and Jensen Ackles contributed to the show's initial success and Supernatural found its niche when it combined demon hunting adventures with a powerful

relationship drama that explored the intense complicated bond between the brothers Supernatural is as much a story of familial ties love and loyalty as it is of saving people hunting things Fan Phenomena Supernatural explores the ongoing fascination and passion for a show that developed a relationship with fans through eight seasons and continues to have an impact on fan culture to the present day Essays here explore the rich dynamic that has developed between fans and producers actors writers directors the show creator and showrunners through online interactions on Twitter and Facebook face to face exchanges at conventions and representations of fandom within the show s meta episodes Contributors also explore gender and sexuality in the show and in fan art the visual dynamics cinematography and symbolism in the episodes as well as the fan videos they inspire and the culture of influence learning and teaching in the series [A Reader's Guide to the Plays of W. B. Yeats](#) Richard H Taylor,1984-02-23 **TV Guide** ,2006 **Meta Television** Erin Giannini,2024-03-18

The idea of metatextuality is frequently framed as a recent television development and often paired with the idea that it represents genre exhaustion US television however with its early live performances and set bound sitcoms always suggested an element of self awareness that easily shaded into metatextuality even in its earliest days Meta Television thus traces the general history of US television s metatextuality throughout television s history arguing that TV s self awareness is nothing new and certainly not evidence of a period of aesthetic exhaustion but instead is woven into both its past and present practice elucidated through case studies featuring series from the 1970s to the present day many of which have not been critically analyzed before and the various ways they deploy metatext to both construct and deconstruct their narratives Further Meta Television asserts that this re and de construction of narrative and production isn t just a reward to the savvy and or knowledgeable viewer or consumer but seeks to make broader points about the media we consume and how we consume it This book explores the ways in which the current metatextual turn in both the usual genres in which it appears horror and sci fi fantasy and its movement into drama and sitcom represents the next turn in television s inherent self awareness It traces this element throughout television s history growing from the more modest reflexivity of programs awareness of themselves as created objects in a particular medium to the more significant breaking of the fictive illusion and therefore the perceived distance between the audience and the series Erin Giannini shows how the increased currency of metatextual television in the contemporary era can be tied to a viewership well versed in its stories and production as well as able and willing to talk back via social media If television reflects culture to a certain extent this increased reflexivity mirrors that responsive audience as a consequence of the lack of distance that metafiction embraces As Robert Stam traced the use and implications of reflexivity in film and literature this book does the same for television further problematizing John Ellis s glance theory in terms of both production and spectatorship **TV Goes to Hell** Stacey Abbott,David Lavery,2011-10 As a natural heir to the hit television series Buffy the Vampire Slayer Supernatural has risen to prominence with a strong cult following and this series of essays from contributors around the globe investigates the genre bending series cultural footprint

Supernatural Out of the Box Lisa Macklem, Dominick Grace, 2020-07-31 Supernatural is one of the most successful horror TV shows ever providing fifteen seasons of the adventures of Dean and Sam Winchester as they hunt monsters and save the world It has nurtured a passionate fan base which has been far more directly integrated into the show than is typical Wry and self aware Supernatural repeatedly breaks out of the televisual box to acknowledge its fans and its own fictionality Though there have already been several studies of Supernatural this volume is the first to focus extensively and intensively on the show's metafictional elements This essay collection argues that Supernatural is not merely a horror show but is a show about how horror works as a genre and how fans interact with their favorite material From exploring how the show has equated authorship with divinity to considering its incorporation of fandom and closely reading several key episodes the essays in this

Time in Television Narrative Melissa Ames, 2012-08 This collection analyzes twenty first century American television programs that rely upon temporal and narrative experimentation These shows play with time slowing it down to unfold the narrative through time retardation and compression They disrupt the chronological flow of time itself using flashbacks and insisting that viewers be able to situate themselves in both the present and the past narrative threads Although temporal play has existed on the small screen prior to the new millennium never before has narrative time been so freely adapted in mainstream television The essayists offer explanations for not only the frequency of time play in contemporary programming but the implications of its sometimes disorienting presence Drawing upon the fields of cultural studies television scholarship and literary studies as well as overarching theories concerning postmodernity and narratology Time in Television Narrative offers some critical suggestions The increasing number of television programs concerned with time may stem from any and all of the following recent scientific approaches to quantum physics and temporality new conceptions of history and posthistory or trends in late capitalistic production and consumption in the new culture of instantaneity or in the recent trauma culture amplified after the September 11 attacks In short these televisual time experiments may very well be an aesthetic response to the climate from which they derive These essays analyze both ends of this continuum and also attend to another crucial variable the television viewer watching this new
