Pedhazur, Liora Pedhazur

Schmelkin, 2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor

Pedhazur and Schmelkin's goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner. The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented. Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt.

Handbook of Research on Teaching in Multicultural and Multilingual Contexts Charamba, Erasmios, 2022-06-24. Several factors have resulted in increased intra and inter state migration. This has led to an increase in the enrollment of students with diverse linguistic backgrounds, placing more academic demands on educators. Linguistic diversity presents both opportunities and challenges for educators across the educational spectrum. Language ideologies profoundly shape and constrain the use of language as a resource for learning in multilingual or linguistically diverse classrooms. While English has become the world language, most communities remain and are becoming more and more multicultural, multilingual and diverse. The Handbook of Research on Teaching in Multicultural and Multilingual Contexts moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires. It examines the phenomenon of language use, language teaching, multiculturalism and multilingualism in different learning areas, giving practitioners a voice to spotlight their efforts in order to keep their teaching afloat in culturally and linguistically diverse situations. Covering topics such as Indigenous languages, multilingual deaf communities and intercultural competence, this major reference work is an essential resource for educators of both K-12 and higher education, pre-service teachers, educational psychologists, linguists, education administrators and policymakers, government officials, researchers and academicians.
