your advice on their developed games and in return they will pay you handsome sum of money I m a living example of it It would be right if I say this is an era of Internet and Video Games Today the game industry is over a 60 billion business The companies that release their produced games with bugs in them will cause them a loss of millions of dollars And no good company will ever want that So they think it a good idea to pay hundreds of dollars to gamers just to point out the glitches in their games So they can release bug free games and customers will not return their games Okay imagine this You are a gamer and you buy a new video game that crashes every time your character shoots the enemy It is obvious that you will not like the game and will never recommend it to anyone else This will be a serious setback for the game company which had invested millions of dollars in the development of the game And when no one buy their games due to the bad word of mouth advertising the result is obvious they will lose millions Then What Are There Programmers For Well programmers are not gamers So they cannot find the bugs that a video game tester will If a company is paying you 50 an hour just to test video games for them that would otherwise ruin the game experience and quite possibly hurt their sales Then what s wrong in it Isn t it a good deal 5 Good Reasons Why Playing Video Games Is An Extremely Easy Way To Earn Money 1 No Pre Requisite No formal education is required to be a video game tester 2 Top Paid Game Testers earn up 120 Per Hour Starting out You can earn 10 120 an hour being a video game tester 3 Get the Games for FREE You keep the games you test without paying a dime 4 video game system You only need one video game system to become a video game tester 5 Work on Your Will You can choose your work hours
