

Wiring Diagram for In-Cab Winch Remote Switches (specifically for Warn X8000i with 5-pin factory remote)

Note: The winch motor seems to have a temporary ground that is only connected when the remote is turned to either the in or out position. I didn't want to bypass this so I simulated the ground loop in the DPDT switch. The winch will still only receive ground when the in dash switch is either turned to the IN or OUT positions.

Thanks to Glenn Bonth from www.webdesignin.com for use of his diagram for my layout.
