Linsley, 1992 Groundwater Dams Hydroelectric power Sewerage and wastewater treatment Flood damage mitigation **Assessment of engineering solutions for solid waste removal from irrigation canals in North Lebanon** Salman, M., Pek, E., Simongini, C., Bizri, Y., El-Korek, N., Lucca, E., 2021-02-26 Waste management in Lebanon is a significant issue anticipating cascading and spill over effect on livelihood environment and agriculture North Lebanon has been experiencing population growth spurts due to humanitarian crises in neighbouring countries that contributes to the urgency of finding sustainable solutions Adequate delivery of response measures is beyond the capacities of local authorities Consequently waste crisis has reached its historical peaks It is unlikely that upcoming years can bring radical shifts related to the trends in rapidly increasing waste generation However the seemingly uncontrollable mechanisms should not lead to inaction but concentrated efforts should be stepped up to eliminate harmful consequences The project Rehabilitation and waste management of El Bared Canal Irrigation System to reduce source to sea pollution and improve livelihoods in the Akkar Region of Lebanon financed by the Government of Norway has been formulated to ensure minimal discharges of waste from El Bared System to the Mediterranean Sea thus improving the livelihoods of the people depending on the system through irrigation canal system rehabilitation solid waste disposal and improved agricultural output and job creation Applying a pilot approach the project mainly focuses on Akkar irrigation scheme to introduce both hard investment and soft measures in response to the waste crisis Following a multi criteria assessment approach the current report maps waste removal technologies and provides recommendations on their functions and suitability in the context of the target area Based on broader understanding of the feasibility it helps come to a decision on technology selection Water Engineering Nazih K. Shammas, Lawrence K. Wang, 2015-05-27 Details the design and process of water supply systems tracing the progression from source to sink Organized and logical flow tracing the connections in the water supply system from the water's source to its eventual use Emphasized coverage of water supply infrastructure and the design of water treatment processes Inclusion of fundamentals

and practical examples so as to connect theory with the realities of design Provision of useful reference for practicing engineers who require a more in depth coverage higher level students studying drinking water systems as well as students in preparation for the FE PE examinations Inclusion of examples and homework questions in both SI and US units

the famous Fluvial Processes in Geomorphology in the early 1960s the work of Luna Leopold Gordon Wolman and John Miller became a key for opening the door to understanding rivers and streams They first illustrated the problem to geomorphologists and geographers Later Chang in his Fluvial Processes in River Engineering provided a basis for engineers showing this group of professionals how to deal with rivers and how to understand them Since then more informative studies have been published Many of the authors started to combine fluvial geomorphology knowledge and river engineering needs such as Tools in Fluvial Geomorphology by G Mathias Kondolf and Herv Pi gay or focused more on river engineering tasks such as Stream Restoration in Dynamic Fluvial Systems Scientific Approaches by Andrew Simon Sean Bennett and Janine Castro Finally Luna Leopold summarized river and stream morphologies in the beautiful A view of the river It appears that we continue to explore this subject in the right direction We better understand rivers and streams and as engineers and fluvial geomorphologists we can establish tools to help bring rivers alive However there is still a hunger for more scientific tools that we could use to further understand rivers and to support the development of healthy streams and rivers with high biodiversity in the present world which has started to face water scarcity
