**Routledge Handbook of Ecological Economics** Clive L. Spash,2017-04-07 Since becoming formally established with an international academic society in the late 1980s ecological economics has advanced understanding of the interactions between social and biophysical reality It initially combined questioning of the basis of mainstream economics with a concern for environmental degradation and limits to growth but has now advanced well beyond critique into theoretical analytical and policy alternatives Social ecological economics and transformation to an alternative future now form core ideas in an interdisciplinary approach combining insights from a range of disciplines including heterodox economics political ecology sociology political science social psychology applied philosophy

**Adsensory Financialisation** Pamela Odih, 2016-09-23 Adsensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical financialisation of healthcare regimes According to Michel Foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being Primarily informed by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of adsensory technologies It argues that a paradoxical feature of adsensory technologies dissimulating that there is nothing Jean Baudrillard is the proliferation of risk This is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology Francois Ewald Adsensory wearable technologies are called upon as a strategy of deterrence Jean Baudrillard to indemnify capitalism's production of signs which dissimulate their simulation In a context in which much that was certain now feigns its own existence the insurance professed by adsensory technologies provides for an unrealisable guarantee against indefinable unknowable risks Based also on case studies of European Court of Justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject Social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision In so doing the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations

Paradoxically in their endeavour to actor network virtual well being health communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism This gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of Foucauldian panoptics and Mathiesen synoptics Adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantal technologies Axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronic embodied times transgressively dissimilating the limits of financialisation are beginning to emerge

**The Robbery of Nature** John Bellamy Foster, Brett Clark, 2020-02-24 Bridges the gap between social and environmental critiques of capitalism In the nineteenth century Karl Marx inspired by the German chemist Justus von Liebig argued that capitalism's relation to its natural environment was that of a robbery system leading to an irreparable rift in the metabolism between humanity and nature In the twenty first century these classical insights into capitalism's degradation of the earth have become the basis of extraordinary advances in critical theory and practice associated with contemporary ecosocialism In *The Robbery of Nature* John Bellamy Foster and Brett Clark working within this historical tradition examine capitalism's plundering of nature via commodity production and how it has led to the current anthropogenic rift in the Earth System Departing from much previous scholarship Foster and Clark adopt a materialist and dialectical approach bridging the gap between social and environmental critiques of capitalism The ecological crisis they explain extends beyond questions of

traditional class struggle to a corporeal rift in the physical organization of living beings themselves raising critical issues of social reproduction racial capitalism alienated speciesism and ecological imperialism No one they conclude following Marx owns the earth Instead we must maintain it for future generations and the innumerable diverse inhabitants of the planet as part of a process of sustainable human development *Forces of Production, Climate Change and Canadian Fossil*
