superficial treatment of your symptoms making you feel good as all drugs do healing refers to the comprehensive treatment of your illness including all main causes and resulting symptoms Because in order to heal the actual illness you have to follow the entire line of causality rendering you ill up to the main reason triggering the actual illness since that makes you sick And if you do not heal or solve it you cannot heal the entire illness you cannot recover and therefore you can never feel better With the drugs prescribed by medicine interfering with your own recovery the entire time You might have already noticed people healing themselves yet it certainly takes more than a strong determination to be successful The endeavor of healing yourself and maintaining your health continuously throughout life might seem complex yet once you master it it takes less time less stress and less effort to stay healthy and fit while you may invest the rest of your time and effort on more important matters as living your life
