She Goes Black 3 Interracial Group Encounters:

Urban Outcasts Loïc Wacquant, 2013-04-26 Breaking with the exoticizing cast of public discourse and conventional research Urban Outcasts takes the reader inside the black ghetto of Chicago and the deindustrializing banlieue of Paris to discover that urban marginality is not everywhere the same Drawing on a wealth of original field survey and historical data Loïc Wacquant shows that the involution of America's urban core after the 1960s is due not to the emergence of an underclass but to the joint withdrawal of market and state fostered by public policies of racial separation and urban abandonment In European cities by contrast the spread of districts of exclusion does not herald the formation of ghettos It stems from the decomposition of working class territories under the press of mass unemployment the casualization of work and the ethnic mixing of populations hitherto segregated spawning urban formations akin to anti ghettos Comparing the US Black Belt with the French Red Belt demonstrates that state structures and policies play a decisive role in the articulation of class race and place on both sides of the Atlantic It also reveals the crystallization of a new regime of marginality fuelled by the fragmentation of wage labour the retrenchment of the social state and the concentration of dispossessed categories in stigmatized areas bereft of a collective idiom of identity and claims making These defamed districts are not just the residual sinkholes of a bygone economic era but also the incubators of the precarious proletariat emerging under neoliberal capitalism Urban Outcasts sheds new light on the explosive mix of mounting misery stupendous affluence and festering street violence resurging in the big cities of the First World By specifying the different causal paths and experiential forms assumed by relegation in the American and the French metropolis this book offers indispensable tools for rethinking urban marginality and for reinvigorating the public debate over social inequality and citizenship at century's dawn

History and Memory in African-American Culture Geneviève Fabre, Robert G. O'Meally, 1994. The relation between history and memory has become an object of increasing attention among historians and literary critics. Through a team of leading scholars, this volume offers a complex picture of the dynamic ways in which an African American historical identity constantly invents and transmits itself in books, art, performance, and oral documents.

Fade to Black and White Erica Chito Childs, 2009-06-16. There is no teasing apart what interracial couples think of themselves from what society shows them about themselves. Following on her earlier ground-breaking study of the social worlds of interracial couples, Erica Chito Childs considers the larger context of social messages conveyed by the media that inform how we think about love across the color line. Examining a range of media from movies to music to the web, *Fade to Black and White* offers an informative and provocative account of how the perception of interracial sexuality as deviant has been transformed in the course of the 20th century and how race relations are understood today.

Ethnicity and Inequality Robert M. Jiobu, 1990-01-01. This book is a study of the relationship between ethnicity and socioeconomic status; it is the first to empirically study both the white and nonwhite underclass. Jiobu uses United States census data on twenty ethnic groups, including specific white groups and specific nonwhite groups. Using the 1980 national census, which contains information on ancestry for the first time, Jiobu demonstrates that it is possible to define ethnic groups in new ways, such as drawing a distinction between race and ethnicity. *Ethnicity and Inequality* tests numerous theories and examines several important questions for ethnic relations: What is the demographic structure underlying the various groups? How can ethnicity, sex, and inequality be explained? Who gains from ethnic inequality? The author concludes by outlining a way to draw the diversity of findings under a single theoretical umbrella.

History and Memory in African-American Culture Genevieve Fabre, Professor of American Literature, University of Paris; Robert O'Meally, Professor of English and African-American Studies, Columbia University, 1994-10-29. As Nathan Huggins once stated, altering American history to account fully for the nation's black voices would change the tone and meaning of the frame and the substance of the entire story. Rather than a sort of Pilgrim's Progress tale of bold ascent and triumph, American history with the black parts told in full would be transmuted into an existential tragedy. Closer, Huggins said, to Sartre's *No Exit* than to the vision of life in Bunyan. The relation between memory and history has received increasing attention both from historians and from literary critics. In this volume, a group of leading scholars has come together to examine the role of historical consciousness and imagination in African American culture. The result is a complex picture of the dynamic ways in which African American historical identity constantly invents and transmits itself in literature, art, oral documents, and performances. Each of the scholars represented has chosen a different site of memory from a variety of

historical and geographical points and from different ideological theoretical and artistic perspectives Yet the book is unified by a common concern with the construction of an emerging African American cultural memory The renowned group of contributors including Hazel Carby Werner Sollors Veve Clark Catherine Clinton and Nellie McKay among others consists of participants of the five year series of conferences at the DuBois Institute at Harvard University from which this collection originated Conducted under the leadership of Genevieve Fabre Melvin Dixon and the late Nathan Huggins the conferences and as a result this book represent something of a cultural moment themselves and scholars and students of American and African American literature and history will be richer as a result
