

Brain Exploration Guide

One way to learn more about how something works is to look inside it. Today you will dissect, or take apart, a sheep's brain. This guide will help you explore the structure of the brain. Your booklet will give you more information about what the different parts of the brain do, and it has space for you to write or draw what you see during the dissection.

Be sure to wear gloves, and to wash your hands thoroughly afterward to wash away any chemicals or tissue that may have gotten on your hands.

ANATOMICAL DIRECTIONS

Similar to using north, south, east, and west to describe relative locations of places on a map, when you are looking at anatomical structures there are terms that are used to help describe the relative location of the brain structures. These terms refer to the orientation of the brain in the body, so they are the same no matter how you hold or rotate the brain.

- **Anterior** (rostral or "towards the nose") means towards the front.
- **Posterior** (caudal or "towards the tail") means towards the back.
- **Lateral** means towards the side.
- **Medial** means towards the middle.
- **Dorsal** ("towards the back") means on top.
- **Ventral** ("towards the stomach") means on the bottom.
