Włodarczyk, 2024-04-15 In a critical ecological approach the entanglement of nature in the discourses of supernatural religious doctrine and practice is often perceived as one of the causes of the instrumentalization of the natural world for anthropocentric hegemony over divine creation. On the other hand, a certain environmental turn can be observed in the theological discourses of various religions. In addition to the eco-theological tendencies present in contemporary theological reflection within the world's main religions, another interesting phenomenon is the attempt to restore archaic forms of spirituality in the materialistic discourses of posthumanism. These issues are critically analyzed in individual articles taking into account various approaches and thematic circles.
