Handling Cautions

Install the cash register in a location not subject to direct sunlight, unusual temperature changes, high humidity, or splashing water.

Do not operate the cash register with wet hands. Water can cause internal component failure.

The cash register plugs into any standard wall outlet (120V AC ± 10%). Avoid connecting any other electrical devices on the same electrical circuit since such connection could cause the cash register to malfunction.

When cleaning the cash register, use a dry, soft cloth. Never use volatile liquids, such as benzene or thinner. Chemicals can discolor or damage the cabinet.

For protection against data loss, please install three new "AA" batteries before using the cash register. However, never forget you must initialize the cash register before installation of batteries, otherwise damage to memory contents or malfunctioning of the register will occur. The register starts up only after installing it and then installing batteries.

For complete electrical disconnection, pull out the main plug.

1. Disconnect the AC cord or power failure. Please install three new "AA" batteries before programming and initializing the cash register. Once installed, the batteries will last approximately one year. When it is time to replace them, the "b.b." symbol will appear on the display to indicate a low battery voltage. When you program the tax status for a department, tax will be automatically added to sales of items assigned to the department according to the programmed tax status for the department. You can also enter tax manually.

There are two tax programming methods. The tax rate method uses a straight percentage rate per dollar. The tax table method requires tax levels. You can enter your rates or local tax officials. Use the method which is acceptable in your state. You can obtain necessary data for tax programming from your local tax office.

For tax table programming, see "Programming".

Tax Rate Programming

The percent rate specified here is used for tax calculation on taxable subsection. Turn the mode switch to the **2/FORM** position and use the following sequence to program the tax rate:

Q → Q → Tax Number (1-4) → Q → R

→ Q → Q → Enter

where R and Q represent the following:

R: Tax rate in 4 digits (leading zeros may be entered). If the rate is fractional (e.g., 4.5%), it should be converted to its decimal equivalent.

(4.5%) before entering.

Q: Minimum taxable amount (0.01 to 99.9999).

Some states, sales whose amounts are less than the minimum taxable amount are not subject to tax. If amounts \$0.01 to \$9.99 are not taxed, the value of Q should be 15 (for \$0.01), the value of the first taxable category.
