Introduction This volume contains a selection of expository articles on quantum field theory and statistical mechanics by  
James Glimm and Arthur Jaffe They include a solution of the original interacting quantum field equations and a description of  
the physics which these equations contain Quantum fields were proposed in the late 1920s as the natural framework which  
combines quantum theory with relativ ity They have survived ever since     Selected Papers of K.C. Chou Yueliang Wu, 2009

depth and elegance T D Lee This volume presents a collection of selected papers written by Prof Chou The papers are  
organized into four parts according to the subject of research areas and the language of publishing journals Part I in English  
and Part III in Chinese are papers on field theories particle physics and nuclear physics Part II in English and Part IV in  
Chinese are papers on statistical physics and condensed matter physics From the published papers it illustrates and is clearly  
evident how Prof Chou was constantly at the frontiers of theoretical physics in various periods and carried out creative

research works experimenting with initial ideas and motivations as well as how he has driven and worked in different key research directions of theoretical physics all for which he has made significant contributions to various interesting research areas and interdisciplinary fields      **Summaries of Papers Presented at the Quantum Electronics and Laser Science Conference** ,1993      **Current Papers** ,1951      *Scientific Papers* Tokyo.
