Check your Oil Drops Regularly—Manufacturer's Recommendation: The lubrication warning light which is incorporated in the instrument panel is a guide to the need for a more frequent oil and filter element change. If the light comes on and continues to glow when the engine is running at its above fast idling speed, it indicates that you are in need of oil service and an oil change, this should be done as soon as possible within a maximum of 100 miles.

For information on regular maintenance and other than lubrication, reference should be made to the manufacturer's instruction book.
