Technical Abstract Bulletin , Simulators for Transportation Human Factors Mark S. Young,Michael G. Lenné,2017-07-06 Simulation continues to be a growth area in transportation human factors From empirical studies in the laboratory to the latest training techniques in the field simulators offer myriad benefits for the experimenter and the practitioner This book draws together current trends in research and training simulators for the road rail air and sea sectors to inform the reader how to maximize both validity and cost effectiveness in each case Simulators for Transportation Human Factors provides a valuable resource for both researchers and practitioners in transportation human factors on the use of simulators giving readers concrete examples and case studies of how simulators have been developed and used in empirical research as well as training applications It offers useful and usable information on the functional requirements of simulators without the need for any background knowledge on the technical aspects focusing on the state of the art of research and applications in transport simulators rather than the state of the art of simulation technology The book covers simulators in operational terms instead of task simulation modelling and provides a useful balance between a bottom up academic approach and a top down practical perspective

A Holistic Approach to Ship Design Apostolos Papanikolaou,2018-12-11 This book introduces a holistic approach to ship design and its optimisation for life cycle operation It deals with the scientific background of the adopted approach and the associated synthesis model which follows modern computer aided engineering CAE procedures It integrates techno economic databases calculation and multi objective optimisation modules and s w tools with a well established Computer Aided Design CAD platform along with a Virtual Vessel Framework VVF which will allow virtual testing before the building phase of a new vessel The resulting graphic user interface GUI and information exchange systems enable the exploration of the huge design space to a much larger extent and in less time than is currently possible thus leading to new insights and promising new design alternatives The book not only covers the various stages of the design of the main ship system but also addresses relevant major onboard systems components in terms of life cycle performance to offer readers a better understanding of suitable outfitting details which is a key aspect when it comes the outfitting intensive products of international shipyards The book disseminates results of the EU funded Horizon 2020 project HOLISHIP
