Implementing a Low-Carbon Future WEILA. GONG,2025-11-03 In an era of intensified geopolitics and of national level political gridlock subnational governments can potentially play an essential role in combating global climate change Can subnational governments introduce and sustain climate policy actions through changes in political leadership How can we understand why some local areas have and continue to deliver on their climate goals while other areas may have set goals but have struggled to deliver them Despite being the world s largest carbon emitter China has pledged to attain peak carbon before 2030 and carbon neutrality before 2060 Since the early 2010s Beijing has selected more than one hundred local low carbon pilots at municipal and provincial levels to engage in policy experimentation Their aim is policy solutions to decouple local economic growth from increased use of fossil fuels In *Implementing a Low Carbon Future* Weila Gong examines four cases of such policy experimentation and finds that local implementation outcomes were mixed Notably Gong finds variation in levels of low carbon policy institutionalization across the case studies This includes varying successes of the standards regulations and laws put into place through these policy experiments Based on original research including over 100 expert interviews comparative case studies and process tracing of four low carbon city pilots Gong opens the black box of the subnational climate policy process in China s centralized political system and identifies mid level local bureaucrats as playing an essential bridge leader role in bringing about implementation successes *Perspectives for marine energy in the mediterranean area volume II* Simone Bastianoni,Riccardo Maria Pulselli,Markos Damasiotis,Maria Vittoria Struglia,Hrvoje Mikulcic,2023-02-08 *Popular Mechanics* ,1936-05 *Popular Mechanics* inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Journal of the Senate of the United States of America** United States. This book is based on the author's 33 years of intensive fieldwork. It chronicles a major movement that shaped the preservation policy in Japan in the 1980s and 1990s, providing thick descriptions of preservationists that are not available anywhere else in English. It also provides clear answers to a series of pressing questions: about preservationists, are they building huggers, are they selfish and myopic, home owners, or are they merely obstacles to urban planning and urban renewal. Since 1984, Saburo Horikawa, Professor of Sociology at Hosei University in Tokyo, has continuously studied the movement to preserve the Otaru Canal in Otaru, Japan. This book shows that the preservation movement was neither conservative nor an obstacle. Rather, the movement sought to promote changes in which the residents' place would continue to be theirs. As such, the word preservation does not mean the prevention of growth and development but rather its control. As is shown in this study, preservation allows for and can even promote change. The original Japanese version of this book, published by the University of Tokyo Press, has won 3 major academic awards, most notably The Ishikawa Prize, the highest award bestowed by the City Planning Institute of Japan. It is extremely unusual that a sociology book should receive such important recognition from the city planning discipline.

The Intersection of Economics and Ecology Gurudas Nulkar, 2024-11-25 p. This book is a machine-generated literature overview highlighting the importance of natural capital while studying the economics of ecology. It puts together available literature on this theme, exploring it through the lens of sustainable development. While the main content is machine-generated, each chapter contains curated published content, an overview, and an introduction by the editor, highlighting important areas and literature gaps, describing the connection of the topic with human economy and examples of negative externalities. The topics seek out research articles that show a connection with mainstream economy or rural livelihoods. The connection between natural capital and human economy is well known, but many of these negative externalities are complex problems to solve. While there is a growing awareness to capture the value of natural capital in economic decision making, there is no universal consensus. However, assessing the economic value of natural resources and ecosystem services and integrating this information into decision-making processes such as cost-benefit analysis, corporate reporting, and government policy making holds a promise of finding long-term solutions to these market failures. By valuing natural capital, decision makers can better understand the economic benefits and costs of different activities and policies and make more informed choices that balance economic, social, and environmental objectives. Containing important introductions by the human editor to plug gaps in literature, the book is a great resource for policy makers, students of economics and sustainable development, non-governmental organisations working in this field, and corporate managers who are responsible for allotting budgets towards corporate social responsibility programs.

Staff Ride Handbook For The Attack On Pearl Harbor, 7 December 1941 : A Study Of Defending America [Illustrated Edition] Lt.-Colonel Jeffrey J.

Gudmens, 2014-08-15. Illustrated with over 80 photos of the ships, commanders, aircraft, and locations involved in the attack on Pearl Harbor. This handbook on Pearl Harbor allows individuals and organizations to study this battle not only in the context

of the Japanese attack but more importantly in the context of issues that are relevant to the current global war on terror In addition to analyzing the actual attack it also enables users of this work to examine the problems associated with conducting joint planning and operations between the US Army the Army Air Forces and the US Navy He also provides insights into the problems of a Homeland Security environment in which intelligence operatives from a foreign nation and potentially even recent immigrants from that foreign nation who are now US citizens can operate with little hindrance in a free and open democratic society Additionally this study provides an opportunity to look at how military commanders and planners prepared for their wartime mission with inadequate resources and equipment

Seeking Virtue in Finance JC de Swaan,2020-09-17 Since the Global Financial Crisis a surge of interest in the use of finance as a tool to address social and economic problems suggests the potential for a generational shift in how the finance industry operates and is perceived J C de Swaan seeks to channel the forces of well intentioned finance professionals to improve finance from within and help restore its focus on serving society Drawing from inspiring individuals in the field de Swaan proposes a framework for pursuing a viable career in finance while benefiting society and upholding humanistic values In doing so he challenges traditional concepts of success in the industry This will also engage readers outside of finance who are concerned about the industry s impact on society
