Corpus-Based Analysis of Ideological Bias Anna Islentyeva, 2020-10-26 Corpus Based Analysis of Ideological Bias presents research combining a range of corpus linguistic techniques which are employed to analyse how migration discourse is re constructed in the contemporary British press Two specialised corpora containing 1 000 news reports editorials and

opinion pieces from five major national British newspapers were collected and annotated for this research. The event separating these two corpora is the 2016 referendum on Britain's membership of the European Union (EU). In its analysis, this book employs both quantitative and qualitative analytical methods with four case studies offering a broad perspective on how the topical socio-political issues of migration and asylum seeking are represented by left and right wing British newspapers. It explores how newspapers reveal their political orientation and promote their political agenda by employing specific linguistic patterns and discursive strategies in this case in the representation of the key social actors within migration discourse. It provides case studies that place a particular focus on the discourses surrounding European migrants and migration within the EU, which proved to be a very popular topic in the British press both before and after the 2016 EU membership referendum, and offers a comparative corpus analysis that seeks to ascertain whether media discourse regarding EU migration has changed in the wake of the referendum. This book is a useful source not only for students of English linguistics and media studies but also for researchers in the fields of applied corpus linguistics, critical discourse studies, contemporary media analysis and metaphor research. Translation, Reception and Canonization of The Art of War Tian Luo, 2022-04-27

The Art of War by Sun Tzu is an ancient yet invaluable Chinese military classic that is still relevant today. This book presents a systematic and in-depth investigation into the translation and reception of The Art of War in Western strategic culture. Aided by three self-built corpora, this book adopts a mixed method of qualitative and quantitative analysis and takes both the core text and its paratexts of The Art of War into consideration. The author highlights the significance of proper approaches to translating culture in regards to the core text and effective measures of culture reconstruction in regards to the paratexts. It is revealed by this investigation that the translated Sun Tzu has undergone three major stages before its canonization in Western discourse. The findings bring to light the multiple factors that contribute to the incorporation of Sun Tzu's strategic wisdom into Western culture. For scholars interested in translation studies, critical discourse analysis as well as strategic studies, this book provides fresh insights and new perspectives.
