Differential Use of Reactive Tokens in Japanese in Turn Management and by Gender Kiyomi Tanaka, 2007-05 This study investigated the distribution of Reactive Tokens in natural conversation by male and female speakers of Japanese According to Clancy et al a reactive token RT is a short utterance produced by an interlocutor who is playing a listener s role during the other

interlocutor s speakership 1996 p 355 Clancy et al classify RTs into five types backchannels reactive expressions collaborative finishes repetitions and resumptive openers This study investigated the distribution of these five types of RTs In particular it studied their use in turn management and their distribution by gender To identify the distribution of the five types of RTs more clearly all five types of Reactive Tokens were divided into two levels those that occurred at the boundary of a Pause bounded Phrasal Unit PPU and those that occurred within a PPU The participants in this study were 82 pairs of native speakers of Japanese 82 female and 82 male native speakers of Japanese between 18 and 22 years of age All pairs consisted of classmates or friends in the same university Participants were audiotaped during 20 minutes of natural conversation Six minutes from each conversation were extracted and RTs were identified and coded using WaveSurfer Sjolander Beskow 2000 Frequencies of RTs per minute were then calculated for each participant Using principal components analysis three coherent components were identified among the ten categories five RT types each at two different levels These three components were labeled sequential RTs accompanying RTs and repetitive RTs Also MANOVA and ANOVA revealed significant differences between Japanese male and female RT use with females using more accompanying RTs than males These findings suggest that different types of Reactive Tokens serve different turn taking functions in Japanese and that factors besides language such as gender may affect a speaker s choice of a particular type of Reactive Token **House**

Wiring United States. Office of Education, H. N. Peterson, 1935 **Second Language Conversations** Rod Gardner, Johannes Wagner, 2005-12-07 This collection is the first to consistently adopt Conversation Analysis as an approach to second language interaction By examining first and second language speakers participation in a wide range of activities it challenges the dominant view of nonnative speakers as deficient communicators Proposing instead to understand second language users conversational participation as interactional achievement the book makes a powerful case for ethnomethodological respecification in second language research Professor Gabriele Kasper University of Hawai i Conversations involving speakers whose first language is not the language in which they are talking have become widespread in the globalized world Migration increased travel for business or pleasure as well as communication through new technologies such as the internet make Second Language Conversations an increasingly common everyday event In this book Conversation Analysis is used to explore natural casual talk between speakers in a second language The contributors shift emphasis away from controlled contexts such as the classroom towards more sociable environments in which people go about their daily routines English German French Japanese Finnish and Danish are all analyzed as second languages within a variety of professional educational and sociable situations This collection of essays aims to present naturally occurring Second Language Conversations in order to show what speakers in these situations do how they utilize first language conversational practices and whether or not grammar vocabulary and pronunciation help or hinder the construction of meaning Plane Surveying United States. Division of Vocational Education, 1935
