Diversity in the Classroom Judith H. Shulman,Amalia Mesa-Bains,2018-10-24 This casebook is part of a nationwide effort to capture and use practitioner

knowledge to better prepare teachers for the reality of today's classrooms given a student population vastly different from that of even a decade ago. Consciously designed to provoke engaging and demanding discussion, the cases presented here are candid, dramatic, highly readable accounts of teaching events or series of events. Set in three of the nation's most diverse cities—San Francisco, Los Angeles, and Phoenix—the cases offer problem-based snapshots of on-the-job dilemmas. The teacher authors discuss topics that generate heated interchange and run the risk of polarizing opinions and creating defensive assumptions, particularly those dealing with bias, race, and class. These issues, plus cultural behaviors and socioeconomic circumstances, have important implications for classroom practices. By examining such issues, the editors hope that educators will see and act on the need for a greater variety of teaching styles, distribution of opportunities, and educational access for all students.

J. Hillis Miller and the Play of Literature Jonathan Locke Hart, 2023-12-27 This is the first book to discuss the full sweep of the work of J. Hillis Miller from his earliest writing in the 1950s to those near the time of his death in February 2021, across the genres of his criticism and theory, poetry, fiction, drama, fiction, non-fiction. The book examines Miller's preference for close and careful reading of individual literary and critical works over abstract theory. The study will discuss the last member of the so-called Yale School of deconstruction to die, but will see him as a reader and lover of literature, someone interested in Georges Poulet and phenomenology and in Jacques Derrida and deconstruction. Miller was concerned about many aspects of literature and life, including the pleasure of reading and writing and in climate change, which he saw as the crisis of our time. Miller was well known in humanities and literature worldwide as one of the greatest of modern critics and theorists.

Study Guide Plus Sociology Barbara Marliene Scott, 2000-09 *Relearning to Teach* David Fawcett, 2019-09-16 *Relearning to Teach* challenges the seemingly complex teaching profession and the various initiatives, strategies, and ideas that are regularly suggested. It explores how teaching methods are used without a clear understanding of why, which leads to ineffective teaching that is believed to work but ultimately doesn't. Cutting through the clutter of conventional teacher guidance, David Fawcett tackles myths head-on, sharing the latest research and explaining how this will look translated to a classroom environment. The book breaks down the complexities of teaching into manageable chunks and offers practical advice on how to take charge of your own CPD to become a more reflective and successful practitioner. Focusing on what's most relevant and helpful to build effective teaching practice and self-improvement, it raises key questions such as: Is lesson planning just a box-ticking exercise? Why do students remember in lessons but forget in tests? Is asking more questions beneficial? Is feedback actually worth it? *Relearning to Teach* is a must-read for all teachers looking to pinpoint the why of teaching methods and to gain an understanding of the reasons why various pedagogies are used within the classroom.

Organising Learning in the Primary School Classroom Mrs Joan Dean, Joan Dean, 2002-11-01 Since its publication in 1984 the first edition of *Organising Learning in the Primary School Classroom* has been recognised as an indispensable guide for primary school teachers in their quest for more effective practice in the classroom. It gives help on everyday problems of classroom organisation: how to group children, how to set out a classroom physically, how to make the most efficient use of time and resources. Throughout the aim is to get teachers and student teachers to analyse their own classrooms and to produce solutions that will work for them. This second edition retains these strengths but has been completely revised to take account of recent thinking in education and of the new situation created by the National Curriculum with its associated assessment. The sections on curriculum content and especially the teaching of science have been expanded and the very useful guidance on topic work now looks at the implications of the National Curriculum for this method of teaching.
