Resources in Education ,1998 [Thomé H. Fang, Tang Junyi and Huayan Thought](#) King Pong Chiu,2016-06-27 In Thom H Fang Tang Junyi and Huayan Thought King Pong Chiu discusses Thom H Fang and Tang Junyi two of the most

important Confucian thinkers in twentieth century China who appropriated aspects of the medieval Chinese Buddhist school of Huayan to develop a response to the challenges of scientism the belief that quantitative natural science is the only valuable part of human learning and the only source of truth As Chiu argues Fang s and Tang s selective appropriations of Huayan thought paid heed to the hermeneutical importance of studying ancient texts in order to be more responsive to modern issues and helped confirm the values of Confucianism under the challenge of scientism a topic widely ignored in academia

Taking seriously critiques of historiography produced in recent decades Vaia Touna advocates for an alternative approach to the way the past is studied From Euripides tragedy Hippolytus to the notion of voluntary associations in the Greco Roman world to the authenticity of traditional villages in Greece Fabrications of the Greek Past argues that meanings and thus identities do not transcend time and space and neither do they hide deep in the core of material artifacts awaiting to be discovered by the careful interpreter Instead this book demonstrates that meanings are always relative to their present day context they are historical products created by social actors through their ever contemporary acts of identification By disturbing the notion of an easily knowable Greek past Touna makes an invaluable contribution to critical scholarship regarding ancient cultures and to contemporary theory about ideological uses of history Naomi Goldenberg University of Ottawa From an insider to Greek tradition expert in its modern appropriations and translations Fabrications is an important stimulus to metatheory and self reflexivity in the study of religion ancient and contemporary Gerhard van den Heever University of South Africa Vaia Touna expertly dissects modern discourses on the past arguing that our contemporary interests don t just color our accounts of the past they constitute them A fantastic book Brent Nongbri author of Before Religion A History of a Modern Concept Encyclopaedia Britannica ,1892 **Aliens Like Us?** Anthony Aveni,2025-03-18

In this authoritative accessible and at times funny and irreverent work distinguished anthropologist Anthony Aveni speaks to the trained astrophysicist and the curious layperson alike about a simple but previously unexplored question Why do we assume aliens if they are really out there behave just like us Aveni s newest work departs from the usual scientific treatment of extraterrestrial intelligence by probing the historical and widely neglected anthropological record which offers relevant analogous incidents of contact among terrestrial cultures Beginning with theories of the evolution of life and culture advocated by astrobiologists Aliens Like Us explores how the Western cultural imagination is influenced by ways of knowing that are deeply embedded in the minds of the questioners for example how we

consider the ownership of property the idea of progress and even the way we classify things The lessons of anthropology offer not only value structures from other cultures that differ profoundly from our own but also testify to the diverse ways in which alien cultures interact Finally on the question of potential first contact Aveni closes with a fascinating exploration of the image of extraterrestrials in popular culture that is derived in part from the hugely influential realm of science fiction
