Valve Timing Study of a Single Cylinder Motorcycle Engine Jefry Dedi Efendi, 2009 In an internal combustion engine valve timing is an important design parameter which affects many engine performance parameters In this study the effect of intake timing of an engine was investigated The engine used in this study combines a 4 stroke engine bottom end with an opposed piston in the cylinder head working at half the cyclical rate of the bottom piston Functionally the second piston replaces the valve mechanism of the original engine that use poppet valve to control intake and exhaust port opening and closing For the analysis Computational Fluid Dynamic CFD software has been used to analyze in cylinder air flow motion during intake stroke process with engine speed of 4000 rpm The intake port of the engine was modified to vary the intake timing The modification of intake port was done by using Computer Aided Design CAD software Solidwork From the CFD analysis the in cylinder air flow pattern and flow distribution before and after intake port modification was clarified Simulation result shows that as the diameter of the port is decreased the pressure drop and velocity of air flow into the engine cylinder are increased Modification of the intake port shape from curved port to straight port was result in more symmetrical in cylinder air flow distribution along the cylinder axis For further study it is strongly recommended to verify the simulation result with the experiment result as soon as the engine was successfully fabricated *Ignition, Timing and Valve Setting* Thomas H. Ignition, Timing and Valve Setting - A Comprehensive Illustrated Manual of Self-Instruction for Automobile Owners, Operators, Repairmen, and All Inter Thomas Herbert Russell, 2007-10 PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The

writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the care of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing
