[Globalization or Regionalization of the American and Asian Car Industry?](#) M. Freyssenet,K. Shimizu,G. Volpato,2003-04-15 The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms internationalization strategies and the social practices that firms impose This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade This book looks specifically at the American and Asian car industry

Hydrogen Energy David Anthony James Rand,Ronald Dell,2008 A transition to renewable and low carbon forms of

energy is being widely debated as a means of securing a sustainable future for mankind Hydrogen Energy Challenges and Prospects a new book from the authors of Clean Energy considers the prospects for hydrogen as a universal energy vector and fuel for the decades to come With no emissions other than water arising from its combustion the potential virtues of harnessing and utilizing hydrogen correlate with recent growing concern over the security of conventional fuel supply and global climate change This book sets out to analyze the technical situation in an objective fashion free from the constraints of political and industrial loyalties Areas covered include pathways to hydrogen production prospects for carbon capture and storage options for hydrogen storage on vehicles fuel cells and fuel cell vehicles Each of the many facets of hydrogen energy is discussed and the challenges to be faced are addressed The authors acknowledge it is not possible to reach a simple unequivocal conclusion regarding overall prospects since the international energy scene is so complex and predicting long term futures is so notoriously difficult Nevertheless the reader will be given compelling pointers indicative of the way in which events might develop This topical book is ideal for undergraduates postgraduates and academics with an interest in hydrogen energy Government agencies and energy professionals will also find this content to be a useful reference source
