Fluid Mechanics of Mixing R. King,2013-03-09 This volume is a selection of the material presented at the 7th European Mixing Congress It is concerned exclusively with mixing in circular section vessels using centrally mounted paddles or similar impellers The contents are arranged under three classifications Modelling of Mixing Processes Mixing Operations and Experimental Techniques The classifications result in the original material appearing in a different order to that of the Congress This arrangement is intended to assist the reader in identifying the topic area by function or application rather than by technology In this book the section on Modelling contains papers which focus on the representation of the mixing process whether by equation scale up criteria or fluid dynamic simulation Similarly Mixing Operations are concerned with the application or function of the mixing process such as mass transfer heat transfer or mixing time Experimental Techniques addresses the tools the researcher needs to use at the data gathering experimental stage It collects together advances made in the various methods used by some of the foremost researchers and indicates those areas still in need of additional instrumentation or methods of data reduction The book is intended for researchers designers and users of mixing equipment and for those planning research and development programmes and who wish to keep up to date with advances in the basic technology and its applications

Services Computing for Language Resources Yohei Murakami,Donghui Lin,Toru Ishida,2018-02-23 Describing the technologies to combine language resources flexibly as web services this book provides valuable case studies for those who work in services computing language resources human computer interaction HCI computer supported cooperative work CSCW and service science The authors have been operating the Language Grid which wraps existing language resources as atomic language services and enables users to compose new services by combining them From architecture level to service composition level the book explains how to resolve infrastructural and operational difficulties in sharing and combining language resources including interoperability of language service infrastructures various types of language service policies human services and service failures The research based on the authors operating experiences of handling complicated issues such as intellectual property and interoperability of language resources contributes to exploitation of language resources as a service On the other hand both the analysis based on using services and the design of new services can bring significant results A new style of multilingual communication supported by

language services is worthy of analysis in HCI CSCW and the design process of language services is the focus of valuable case studies in service science By using language resources in different ways based on the Language Grid many activities are highly regarded by diverse communities This book consists of four parts 1 two types of language service platforms to interconnect language services across service grids 2 various language service composition technologies that improve the reusability efficiency and accuracy of composite services 3 research work and activities in creating language resources and services and 4 various applications and tools for understanding and designing language services that well support intercultural collaboration
